## **Introduction and Background**

# Air traffic has been vulnerable to external factors including disease outbreaks

# What can we learn from past experience? SARS, Aviation flu and MERS

## Impact of past outbreaks on aviation

History shows that SARS has the most serious impact on traffic. At the height of the outbreak (May 2003), monthly RPKs of Asia-Pacific airlines were 35% lower than their pre-crisis levels. Overall in 2003, Asia-Pacific airlines lost **8% of annual RPKs** and **\$6 billion of revenues**.
