UNITING AVIATION

Effects of Novel Coronavirus (COVID-19) on Civil Aviation: Economic Impact Analysis

Montréal, Canada

2 April 2020

- **Introduction, background and situation overview**
- **Global level analysis**
 - Impact on International Passenger Traffic
 - Impacts on Airports and Tourism
- **State level scenario analysis**
 - China
 - Republic of Korea
 - Italy
 - Iran (Islamic Republic of)
- **Appendix: Scenario assumptions**

The preliminary estimates indicate the COVID-19 impact on scheduled international passenger traffic during first half 2020, compared to Baseline (originally-planned):

- Overall reduction of **37 to 48% of seats offered by airlines**
- Overall reduction of **411 to 535 million passengers**
- Approx. **USD 90 to 118 billion potential loss** of gross operating revenues of airlines

depending upon the V- or U-shaped path

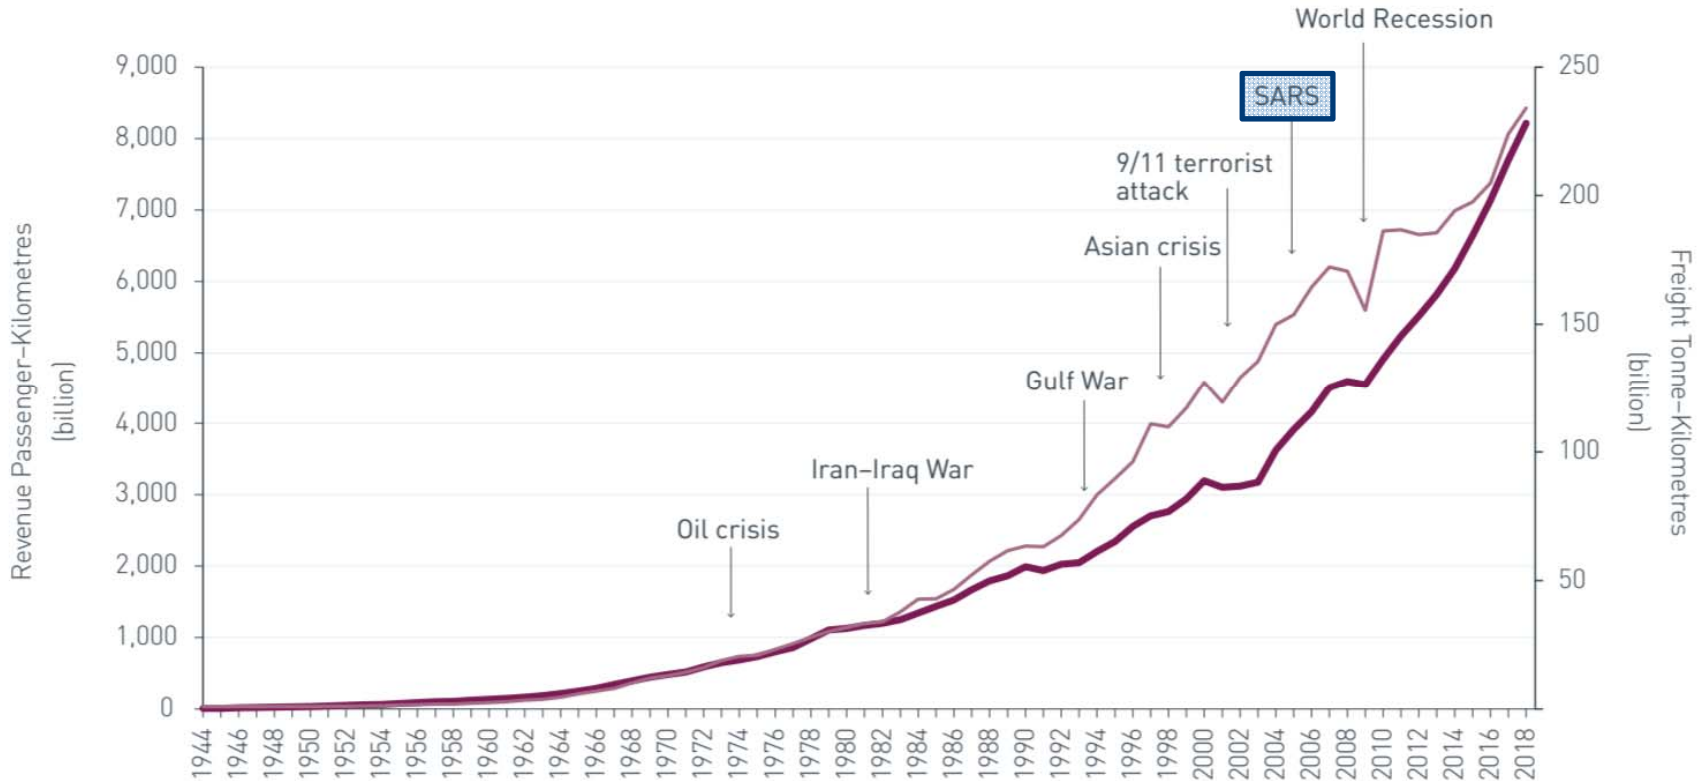

ICAO

UNITING AVIATION

Introduction, Background and Situation Overview

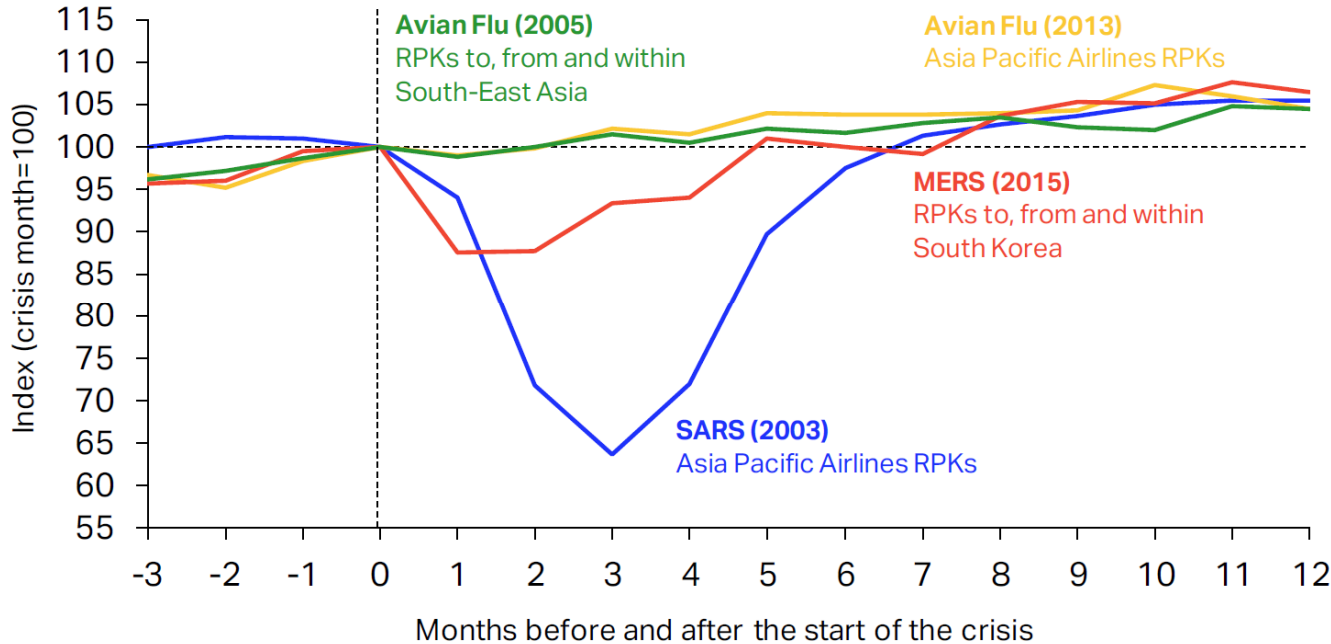

Air traffic has been vulnerable to external factors including disease outbreaks

Previous outbreaks/pandemics had a V-shaped impact on aviation

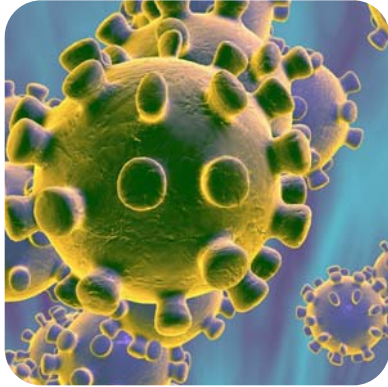

Impact of past outbreaks on aviation

History shows that SARS has the most serious impact on traffic. At the height of the outbreak (May 2003), monthly RPKs of Asia-Pacific airlines were 35% lower than their pre-crisis levels. Overall in 2003, Asia-Pacific airlines lost **8% of annual RPKs** and **\$6 billion of revenues**.

Source: IATA Economics

Disease outbreak directly impacts air traffic and revenues of aviation industry

Number of cases / countries affected

- Flights cancellations
- Aircraft groundings
- Travel bans
- Border closures

Traffic decline

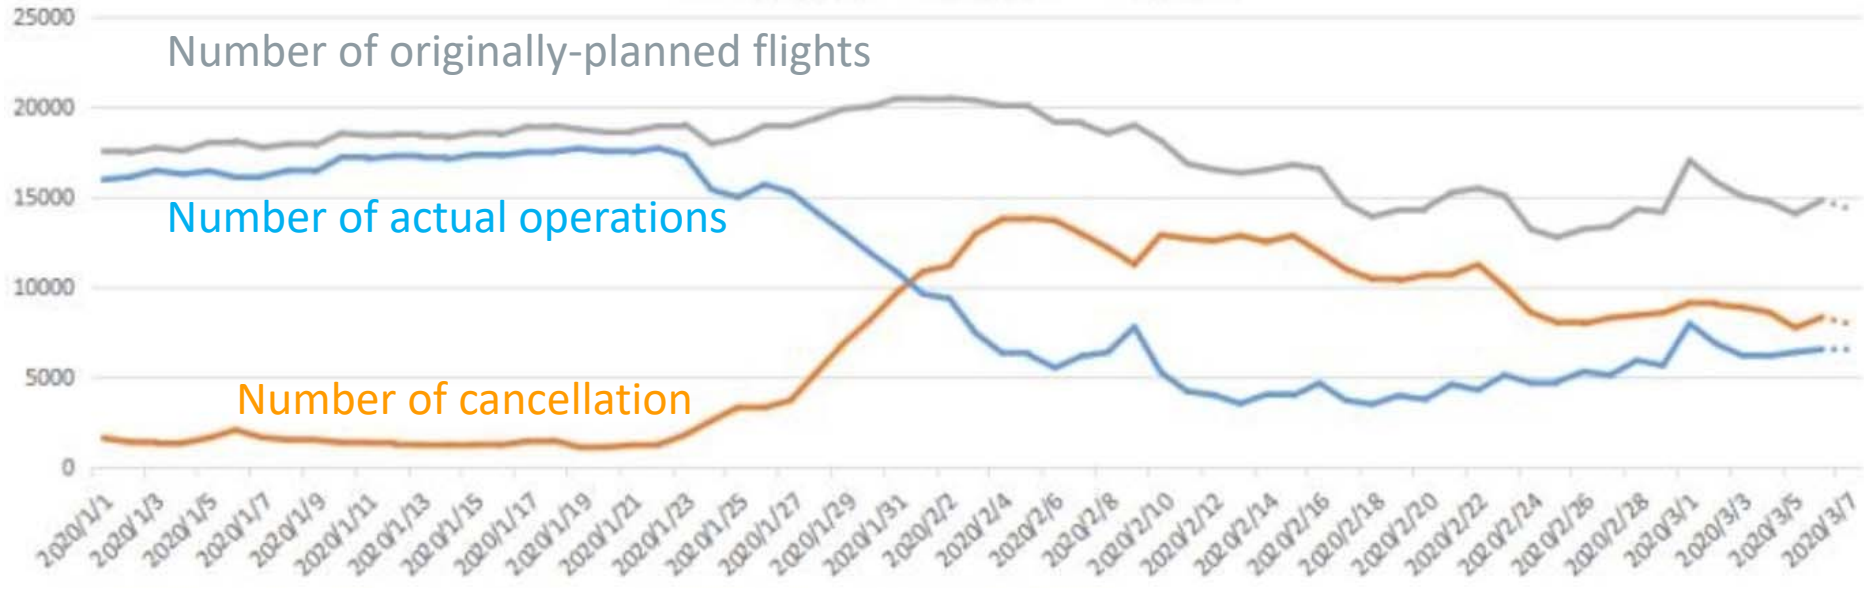

- Fewer flights
- Lower load factors
- Impact on yield

Revenue loss

- Proportionate to traffic loss
- Decline in unit revenues, especially in non-aeronautical (airports)

COVID-19 outbreak has impacted air traffic for China starting from late January 2020

Note: The above includes a) international from mainland China, Hong Kong SAR of China, Macao SAR of China, Taiwan, Province of China; b) domestic within mainland China, and c) regional between mainland China and Hong Kong SAR, Macao SAR and Taiwan Province

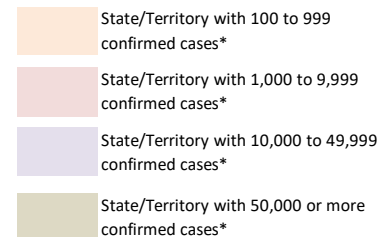

A surge of COVID-19 confirmed cases occurred in several States by late February 2020

February 2020 International passenger seat capacity		
Country/Territory	Capacity change from originally-planned	
China	- 10,532,219	-61%
Hong Kong SAR of China (CN)	- 2,363,320	-36%
Republic of Korea	- 1,717,147	-19%
Japan	- 1,592,429	-15%
Thailand	- 1,452,478	-15%
Taiwan, Province of China (CN)	- 1,446,686	-23%
Singapore	- 807,608	-12%
Viet Nam	- 731,936	-16%

In March 2020, COVID-19 and its impacts have gone global. International passenger capacity so far **reduced by 33%**, with significant reduction not only in States experiencing an early outbreak but also at the worldwide scale.

*: Coronavirus Disease 2019 (COVID-19) Situation Report by WHO (29 March 2020)

Available seat kilometres (ASKs, international and domestic)

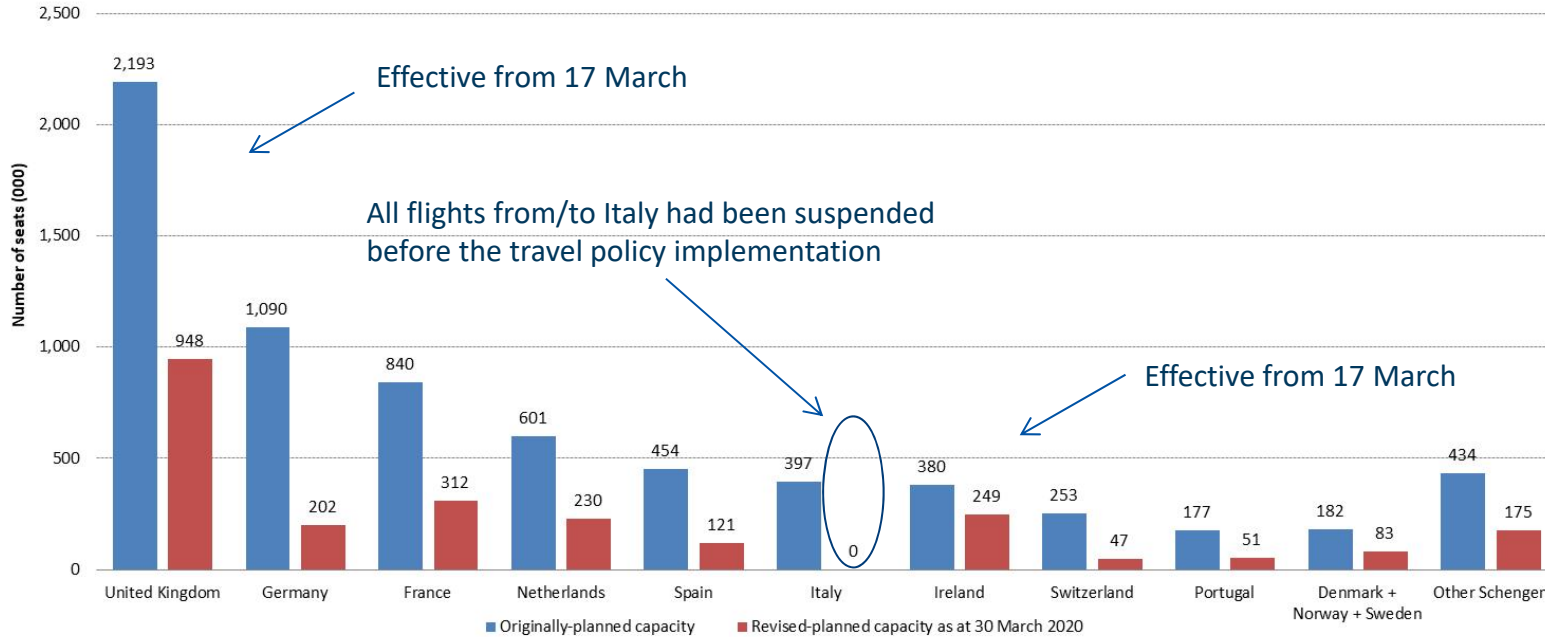

Note: March 2020 data is up till 21 March 2020

Drastic reduction in air traffic amplified by travel restrictions amid COVID-19 outbreak

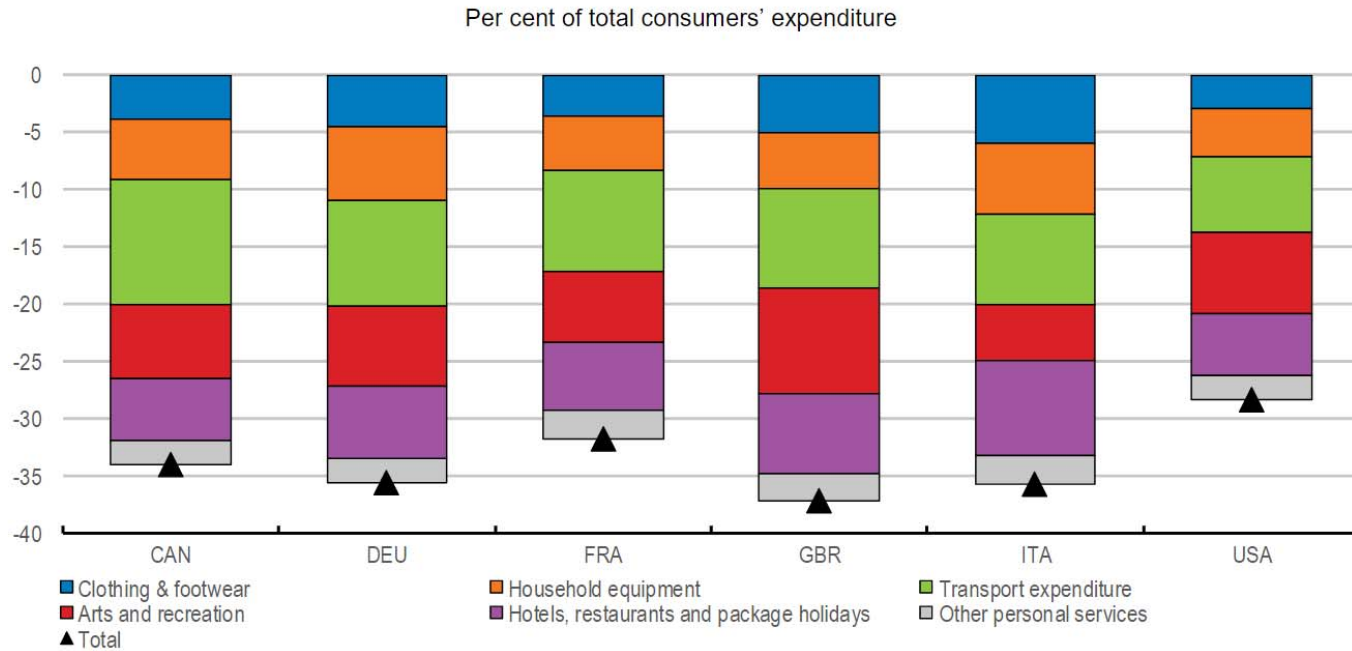

International passenger capacity between U.S. and Schengen Area + UK/Ireland
(for 30 days from 14 March with entry restrictions by the U.S. travel policy announced on 10 March 2020)

As of 30 March 2020, **65%** capacity reduction so far since the announcement of U.S. travel policy, affecting a maximum of approx. **5.5 million passengers** for one month if all the flights were suspended

Sharp decrease in consumers' expenditures for air travel due to containment measures

The potential initial impact of partial or complete shutdowns on private consumption in selected G7 economies

Global Level Analysis

Figures and estimates herein is preliminary and subject to substantial changes.
The analysis will be updated with the situation evolving and more information available.

COVID-19 impact scenarios: Indicative V- and U-shaped paths

Three scenarios to measure the possible impact of COVID-19 outbreak on scheduled **international passenger** traffic worldwide for **first half of the year 2020 (1Q and 2Q 2020)**:

- ❑ **Baseline:** hypothetical situation without COVID-19 outbreak, i.e. originally-planned
- ❑ **Scenario 1:** V-shaped path, quick recovery from May 2020
- ❑ **Scenario 2:** U-shaped path, prolonged contraction to June 2020

Assumptions used for each scenario are summarized in **Appendix**

- Given a rapidly changing environment, Scenarios 1 and 2 are merely indicative of two possible paths out of many. The exact path will depend upon various factors, inter alia, duration and magnitude of the outbreak and containment measures, availability of government assistance, consumers' confidence, and economic conditions.
- Scenarios 1 and 2 are differentiated in terms of **supply (output)** and **demand (spending)** conditions, mainly, a) the timing and scale of airline capacity decline and recovery, and b) the degree of consumers' confidence for air travel that can be translated into demand or load factor.

Impact on International Passenger Traffic

The preliminary estimates indicate the impact in terms of **scheduled international passenger traffic during first half 2020** compared to **Baseline (originally-planned)**:

Scenario 1 (V-shaped path)

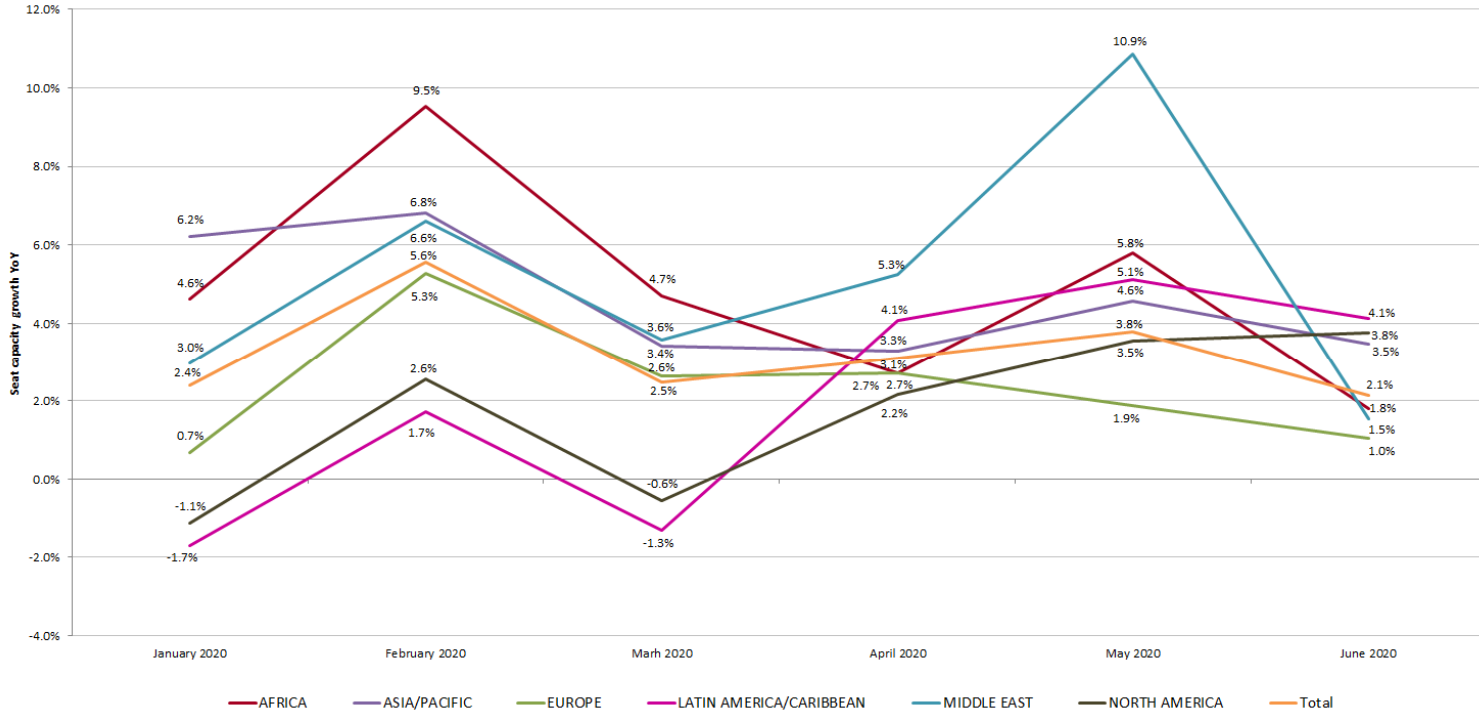

- Overall reduction of **37% of seats offered by airlines**
- Overall reduction of **411 million passengers**
- Approx. **USD 90 billion potential loss** of gross operating revenues of airlines

Scenario 2 (U-shaped path)

- Overall reduction of **48% of seats offered by airlines**
- Overall reduction of **535 million passengers**
- Approx. **USD 118 billion potential loss** of gross operating revenues of airlines

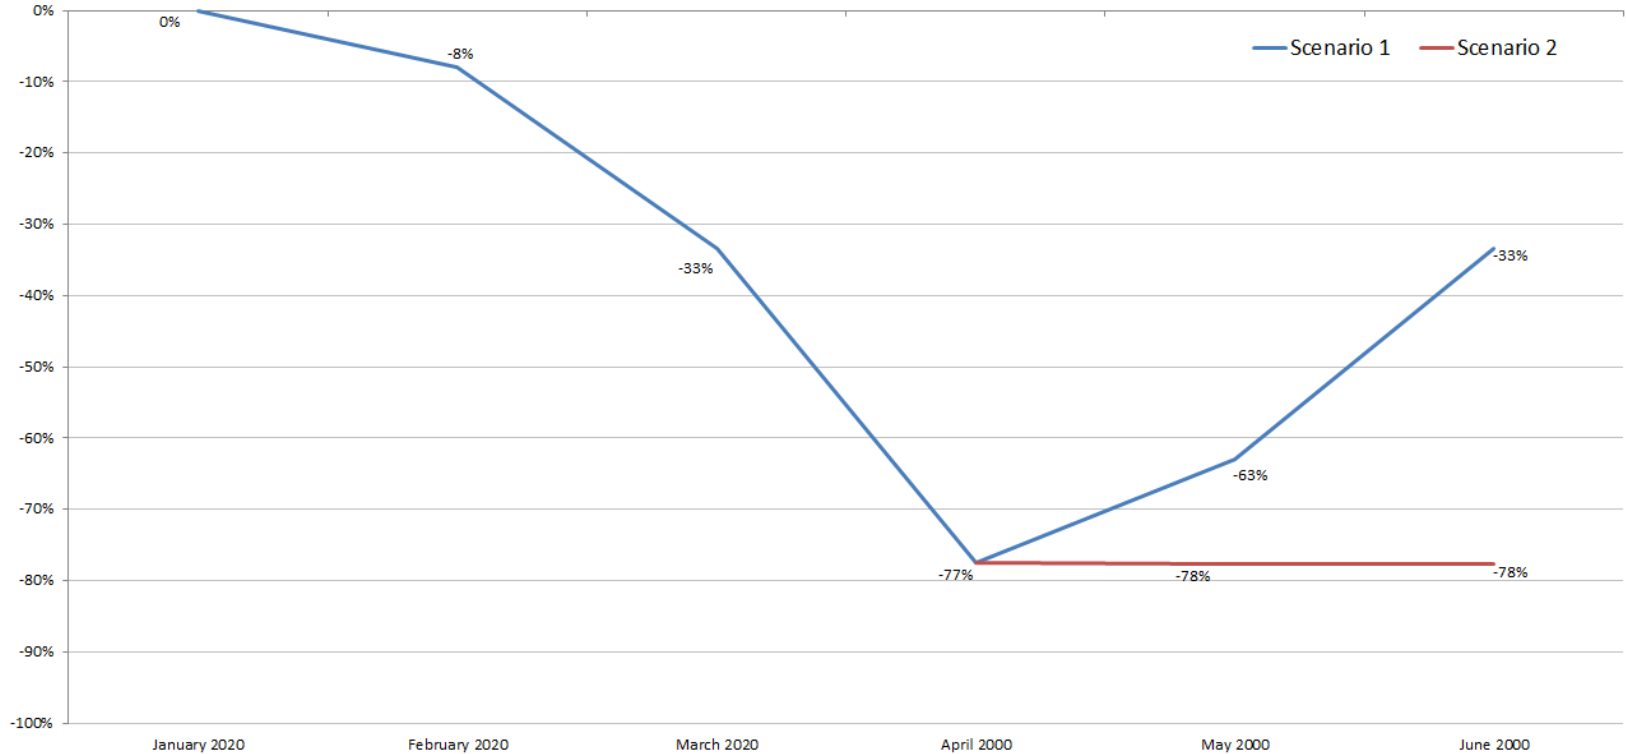

Baseline: 3% seat capacity increase (year-on-year) globally for first half 2020

A total of YoY 3.2% seat capacity increase originally - planned for 1Q 2020 (scheduled international passenger set number)

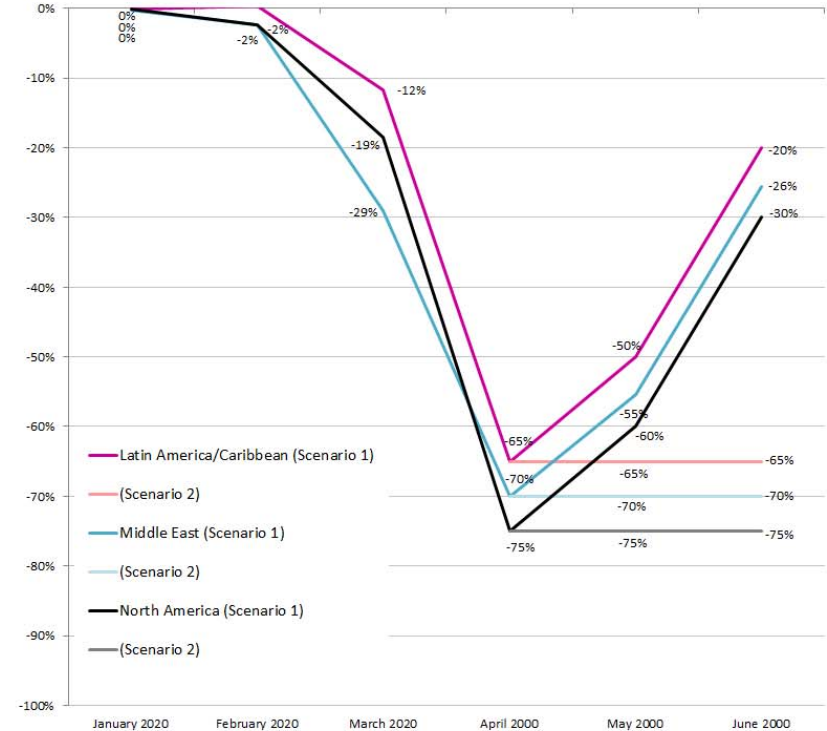

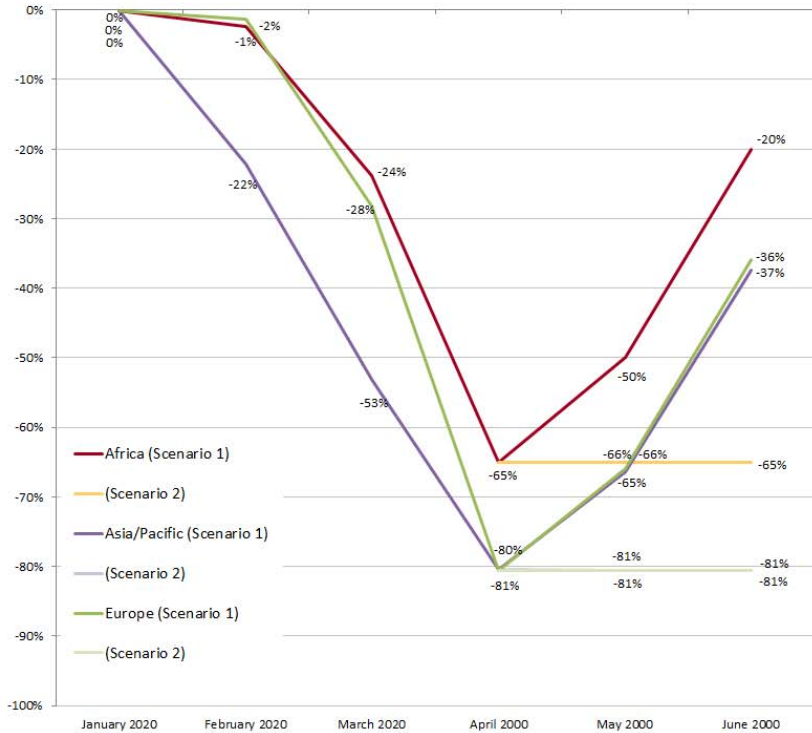

Scenarios 1 & 2 show 37 to 48 % seat capacity reduction in first half 2020 from Baseline

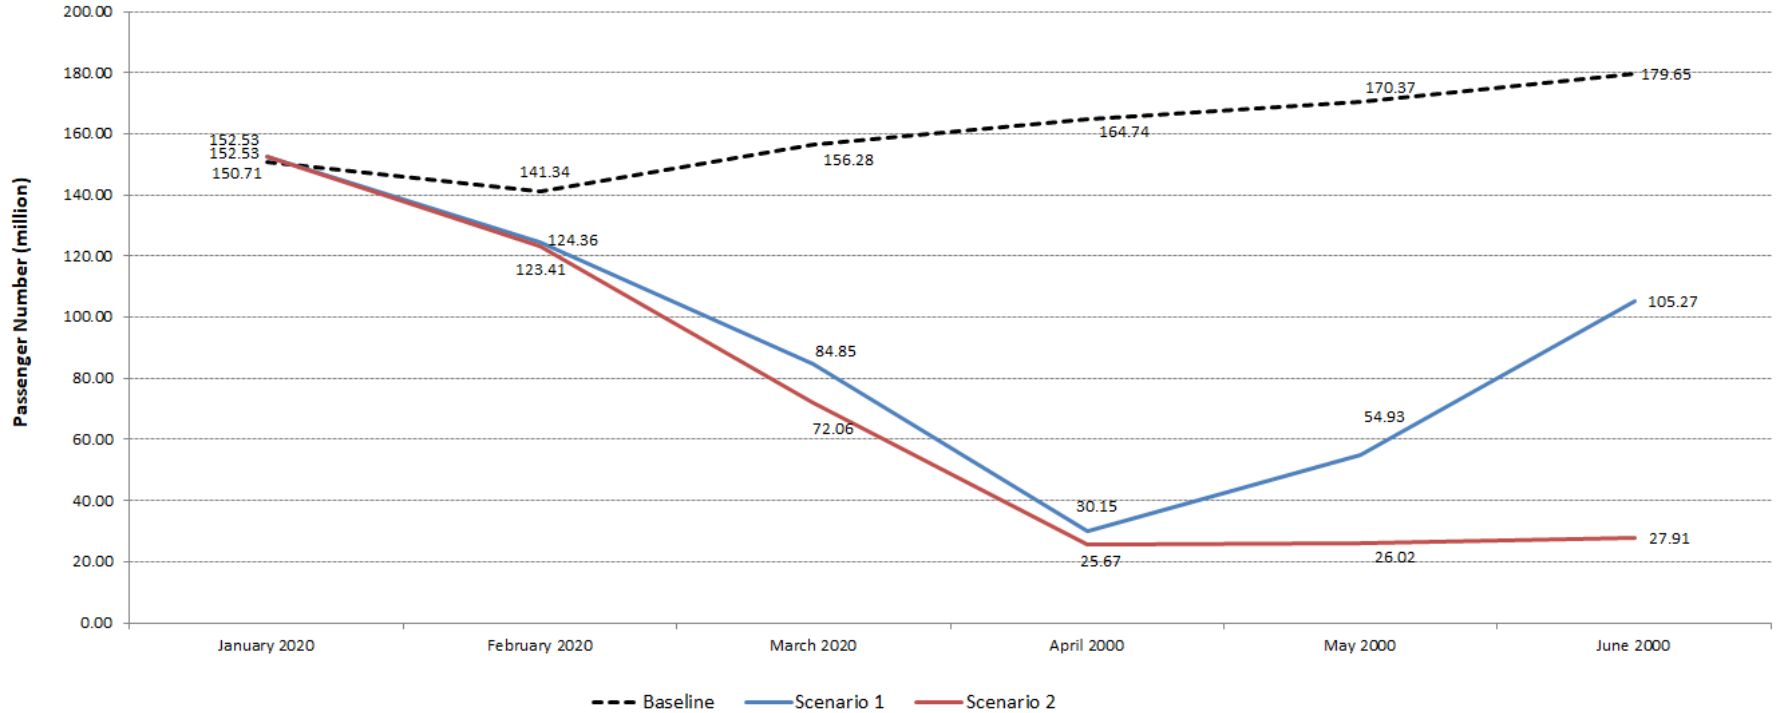

Break-down of seat capacity by region

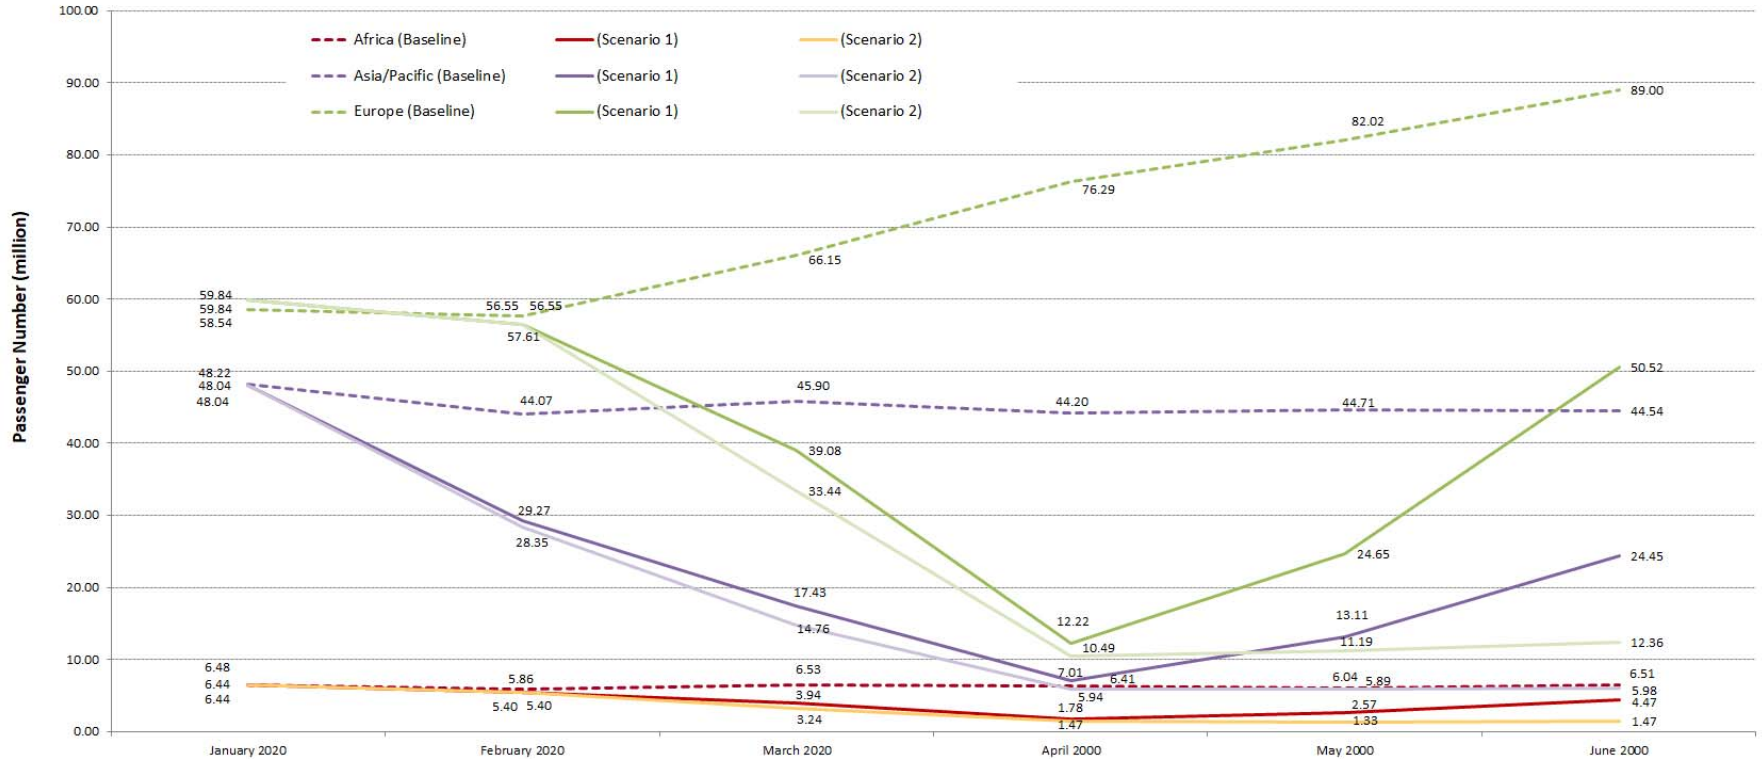

A total of 411 to 535 million passenger reduction in first half 2020 compared to Baseline

Note: Number of international passengers departing from each country and territory, which are aggregated at the regional level to avoid double counting

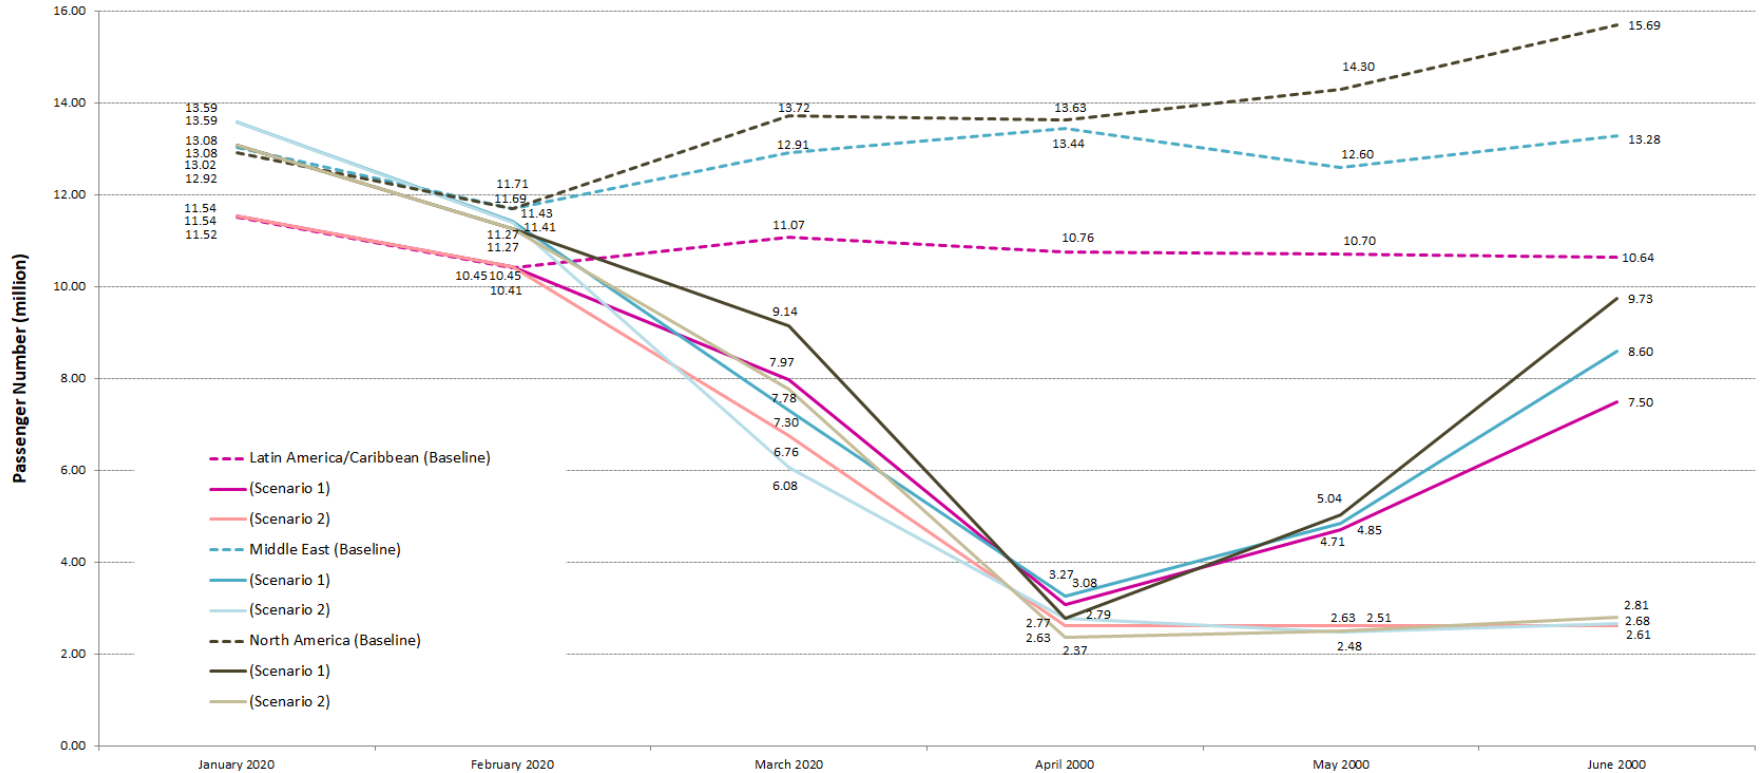

Break-down of passenger number by region (1)

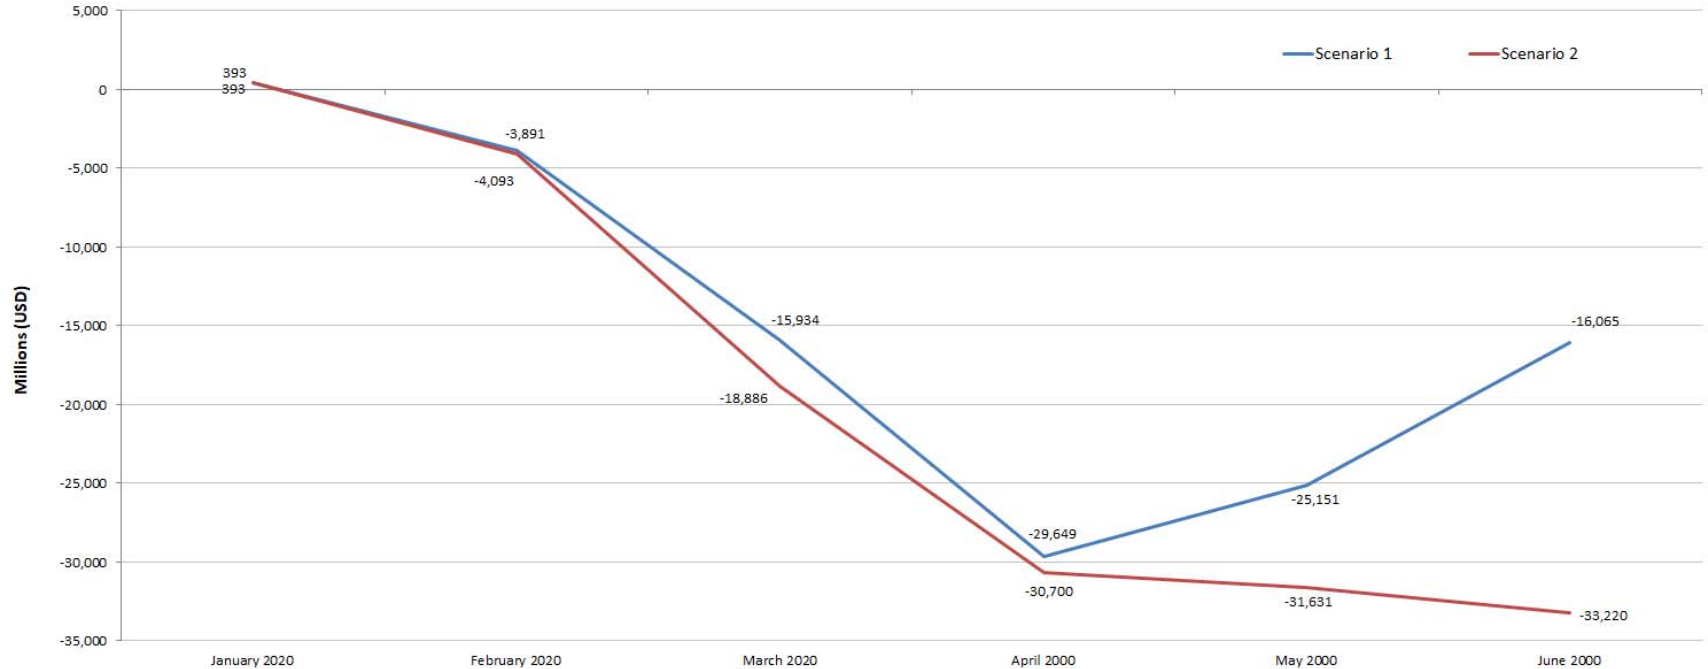

Break-down of passenger number by region (2)

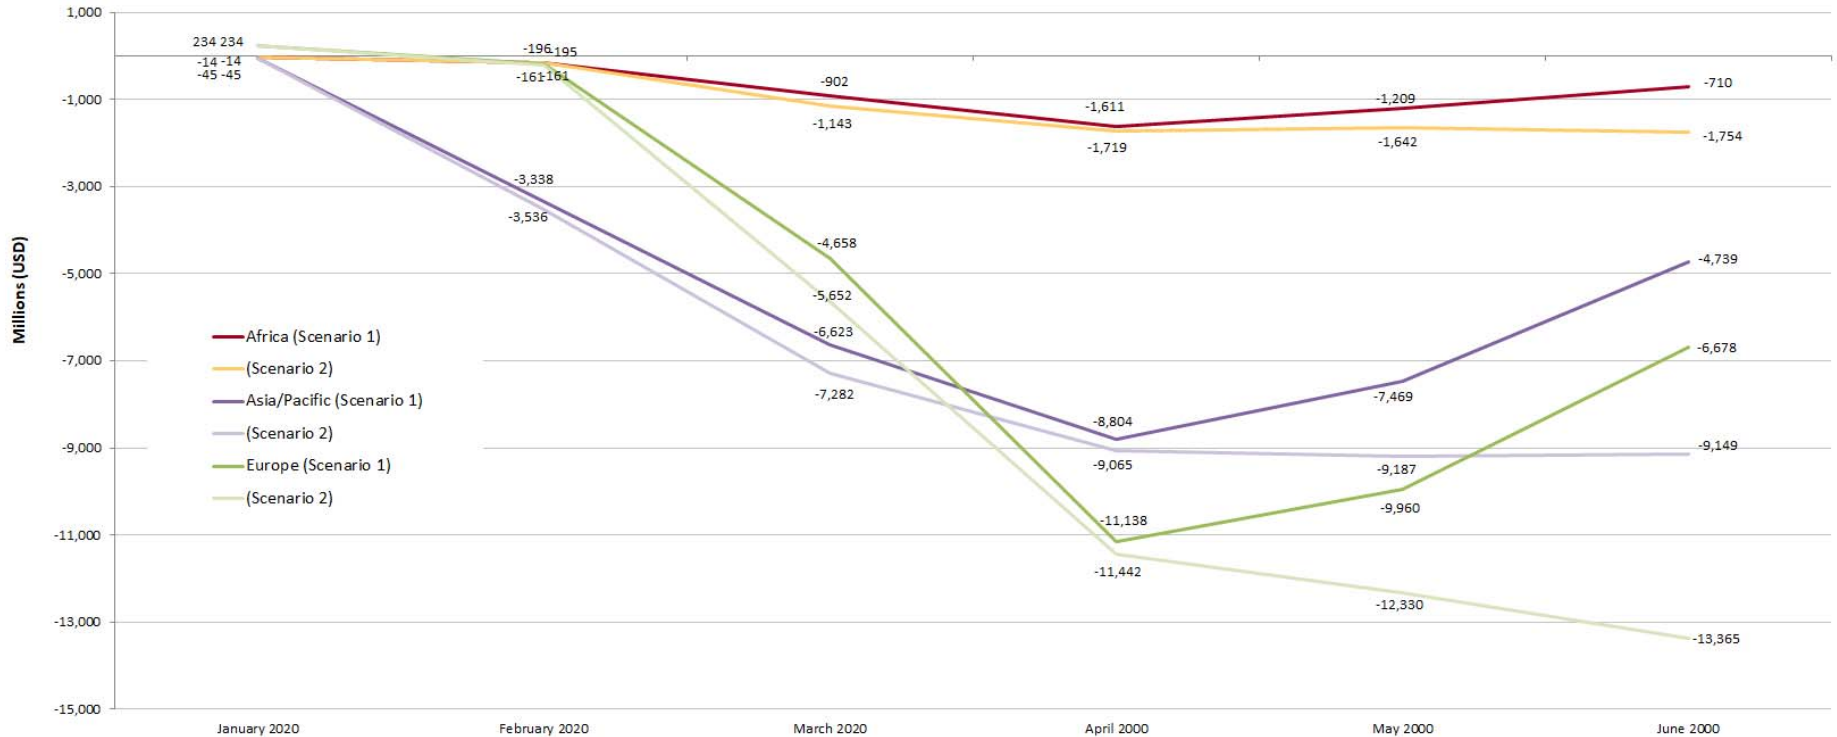

Approx. USD 90 to 118 billion loss of airline revenues in first half 2020 compared to Baseline

Note: The above revenues are gross passenger operating revenues of all airlines serving international routes from each country and territory, which are aggregated at the regional level (revenues of international routes to each country and territory were removed to avoid double counting).

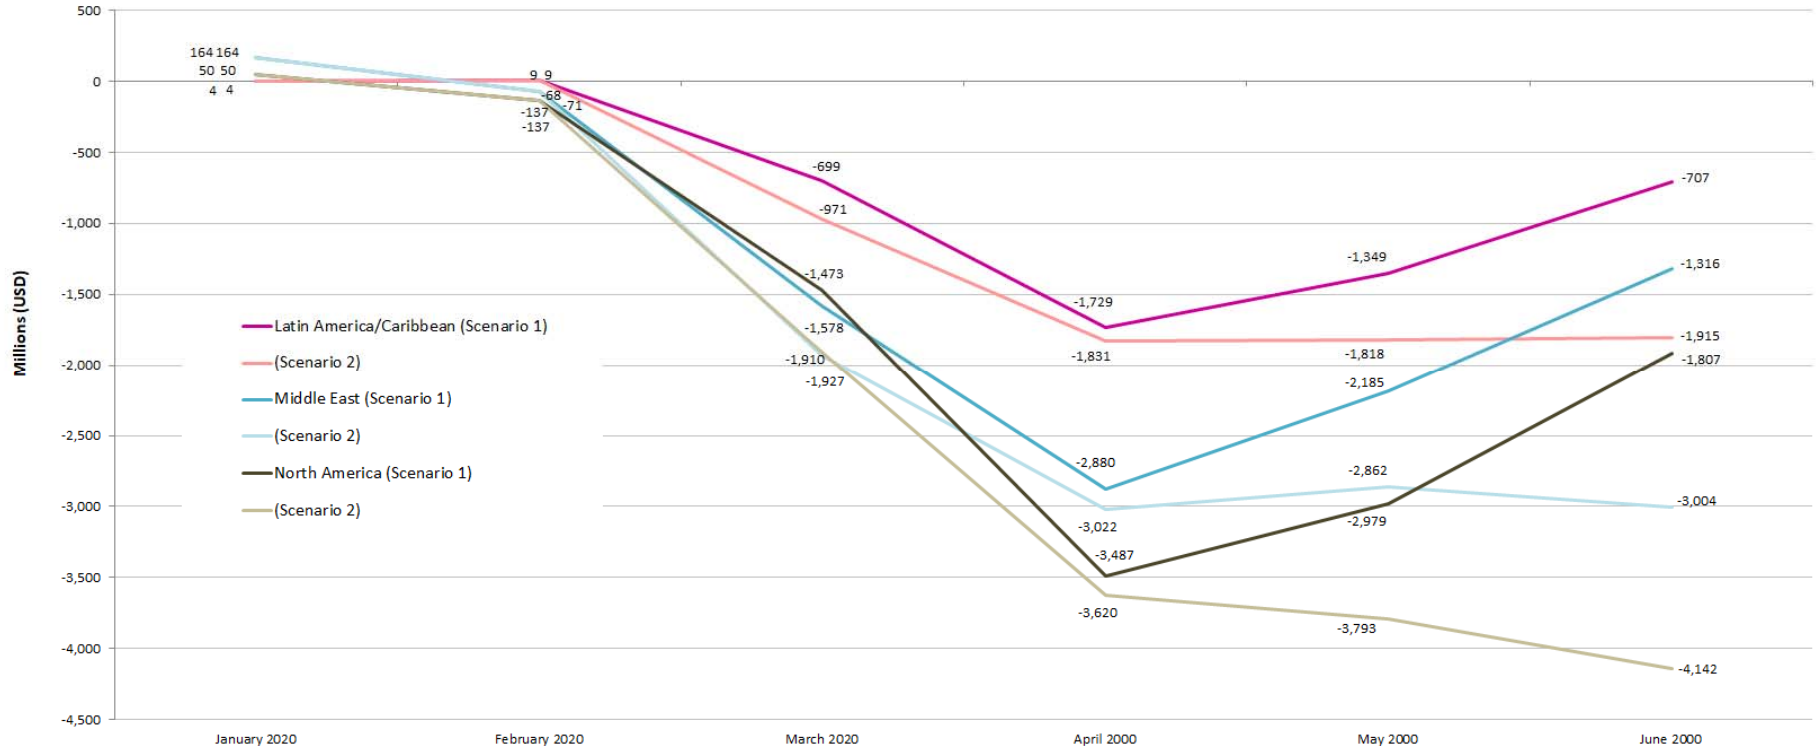

Break-down of revenue reduction by region (1)

Break-down of revenue reduction by region (2)

Biggest overall impact in Europe and Asia/Pacific, followed by North America and Middle East

Region	Scenario 1 (V-shaped) compared to Baseline (originally-planned) for first half 2020			Scenario 2 (U-shaped) compared to Baseline (originally-planned) for first half 2020		
	Seat Capacity (%)	Passenger number (million)	Gross passenger revenue (USD, billion)	Seat Capacity (%)	Passenger number (million)	Gross passenger revenue (USD, billion)
AFRICA	-26.9%	-13.24	-4.61	-37.2%	-18.48	-6.43
ASIA/PACIFIC	-42.9%	-132.33	-31.02	-52.3%	-162.67	-38.26

EUROPE	-894	-35.0%	-24.6	-42%
LATIN AMERICA/CARIBBEAN	-244	-34.0%	-4.0	-38%
MIDDLE EAST	-157	-36.5%	-5.7	-43%
NORTH AMERICA	-790	-37.7%	-16.9	-49%
Total	-3,627	-38.1%	-76.6	-45%

<https://aci.aero/about-aci/priorities/health/covid-19/>

A loss of USD 300 to 450 billion in international tourism receipts for 2020 (estimated by UNWTO)

2020 forecast - international tourism receipts, world (US\$ billion)

<https://www.unwto.org/news/international-tourism-arrivals-could-fall-in-2020>

State Level Scenario Analysis

**Figures and estimates herein will be updated
with the situation evolving and more information available.**

Estimated impact on 4 States with the highest number of confirmed cases*

Three scenarios to measure the possible impact of COVID-19 outbreak at State level:

- ❑ **Baseline:** hypothetical situation without COVID-19 outbreak, i.e. originally-planned
- ❑ **Scenario 1:** V-shaped path, quick recovery from May 2020
- ❑ **Scenario 2:** U-shaped path, prolonged contraction to June 2020

Assumptions used for each scenario are summarized in **Appendix**

Estimated impact of COVID-19 outbreak on scheduled **international passenger** traffic **from/to** the following States during **first half 2020** compared to originally-planned:

- **China (including Hong Kong/Macao SARs and Taiwan Province):** 57 to 66% seat capacity reduction, 86 to 99 million passenger reduction, USD 19.4 to 22.5 billion loss of gross operating revenues of airlines from/to the country
- **Republic of Korea:** 46 to 55% seat capacity reduction, 23 to 28 million passenger reduction, USD 4.7 to 5.8 billion loss of gross operating revenues of airlines from/to the country
- **Italy:** 50 to 60% seat capacity reduction, 34 to 41 million passenger reduction, USD 4.0 to 4.9 billion loss of gross operating revenues of airlines from/to the country
- **Iran (Islamic Republic of):** 43 to 49% seat capacity reduction, 2.4 to 2.8 million passenger reduction, USD 370 to 450 million loss of gross operating revenues of airlines from/to the country

* *Coronavirus Disease 2019 (COVID-19) Situation Report* by WHO as of 15 March 2020

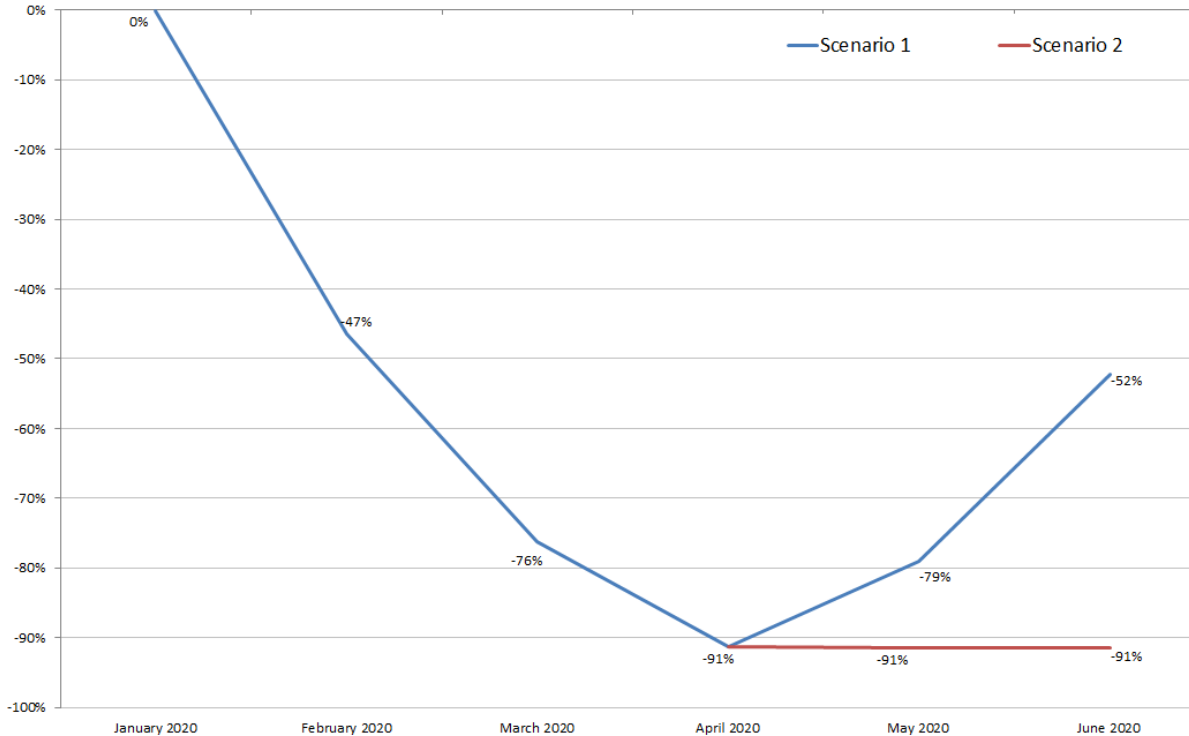

China

The estimates indicate the impact in terms of scheduled international passenger traffic from/to China (including Hong Kong SAR of China, Macao SAR of China, Taiwan, Province of China, and cross-strait services) during first half 2020 compared to originally-planned:

- Overall reduction of **57 to 66% of seats offered by airlines**
- Overall reduction of **86 to 99 million passengers**
- Approx. **USD 19.4 to 22.5 billion potential loss** of gross operating revenues of airlines

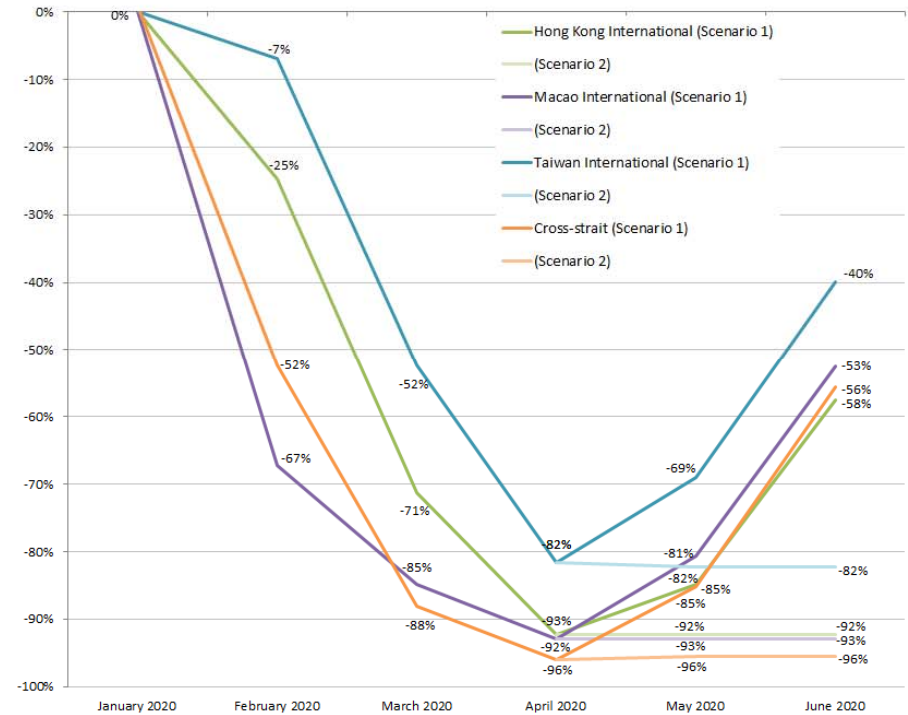

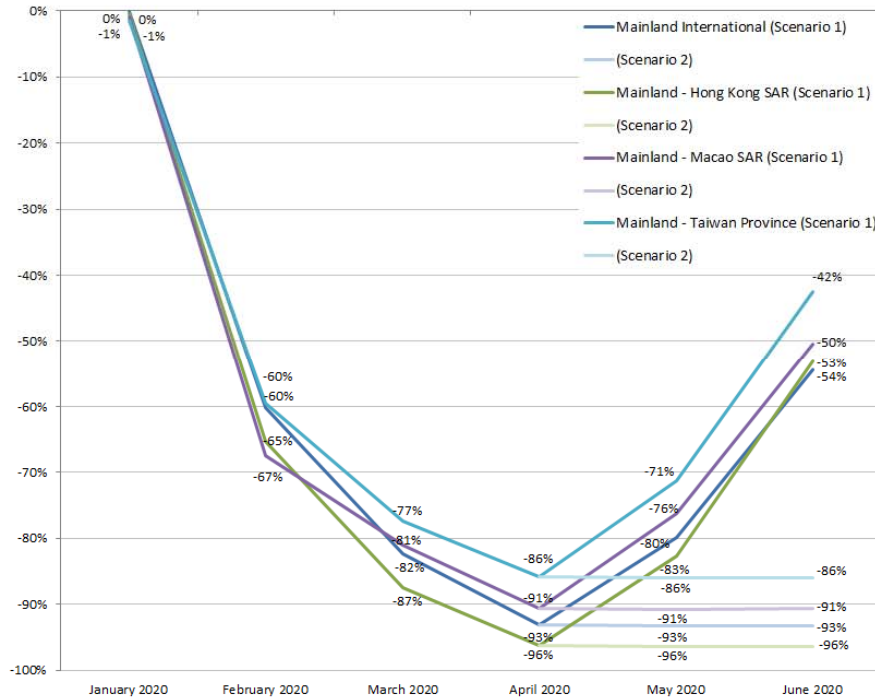

A total of 57 to 66% seat capacity reduction in first half 2020 from Baseline

- **“Mainland International”** refers to scheduled international passenger services from/to mainland China, excluding “Regional”, “Hong Kong International”, “Macao International”, “Taiwan International” and “Cross-Strait”
- **“Regional”** refers to scheduled passenger services between mainland China and Hong Kong SAR of China, between mainland China and Macao SAR of China, and between mainland China and Taiwan, Province of China
- **“Hong Kong International”** refers to scheduled international passenger services from/to Hong Kong Special Administrative Region (SAR) of China excluding “Regional” and “Cross-Strait”
- **“Macao International”** refers to scheduled international passenger services from/to Macao SAR of China, excluding “Regional” and “Cross-Strait”
- **“Taiwan International”** refers to scheduled international passenger services from/to Taiwan, Province of China, excluding “Regional” and “Cross-Strait”
- **“Cross-Strait”** refers to scheduled passenger services among Hong Kong SAR of China, Macao SAR of China and Taiwan, Province of China, excluding “Regional”

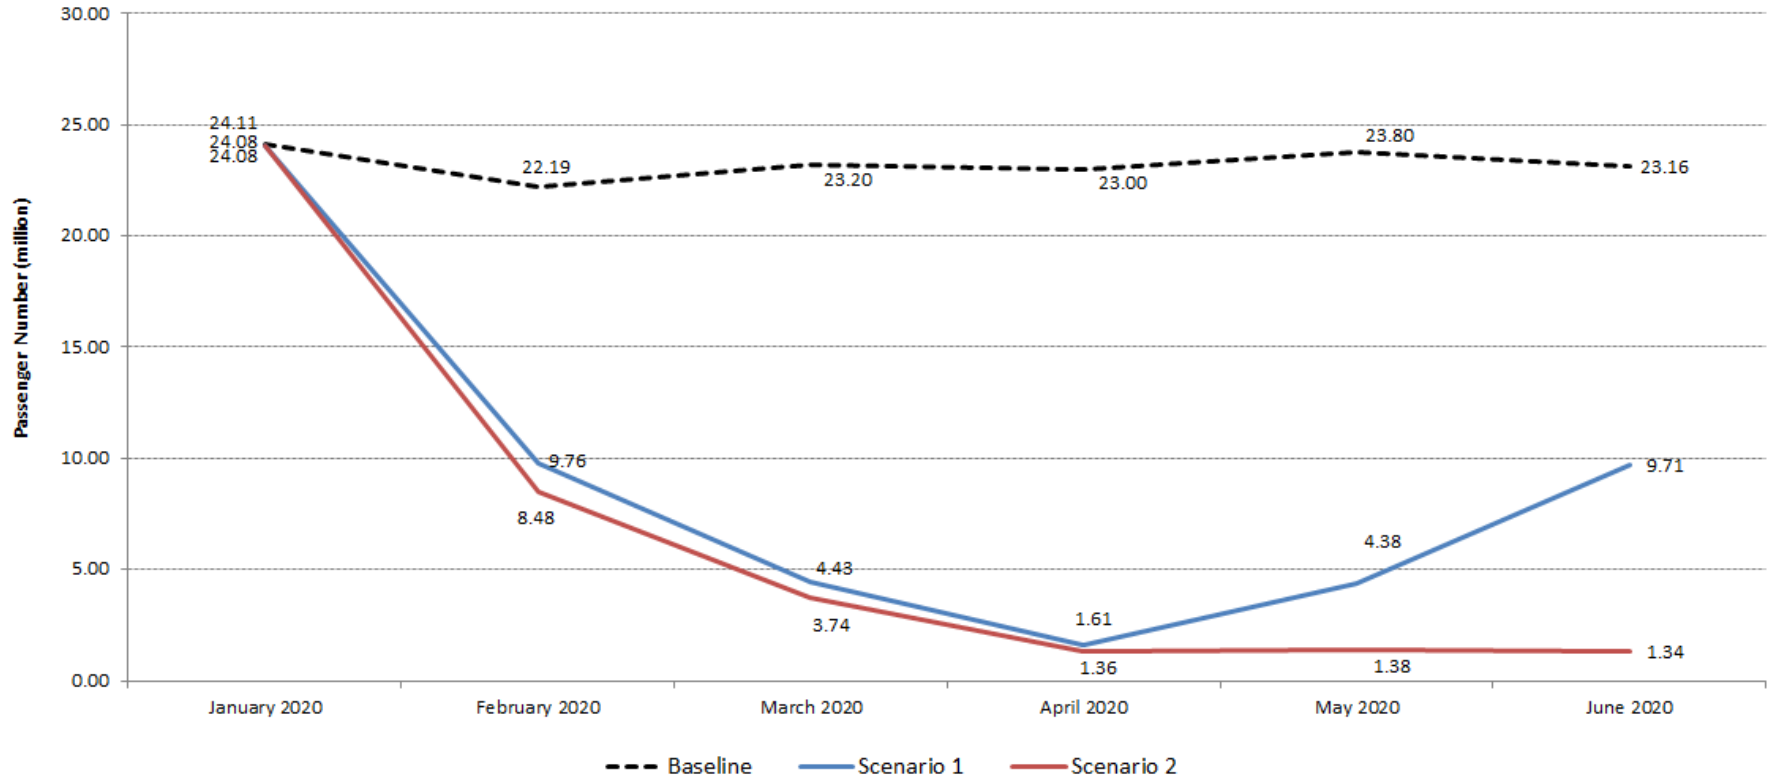

Break-down of seat capacity by route

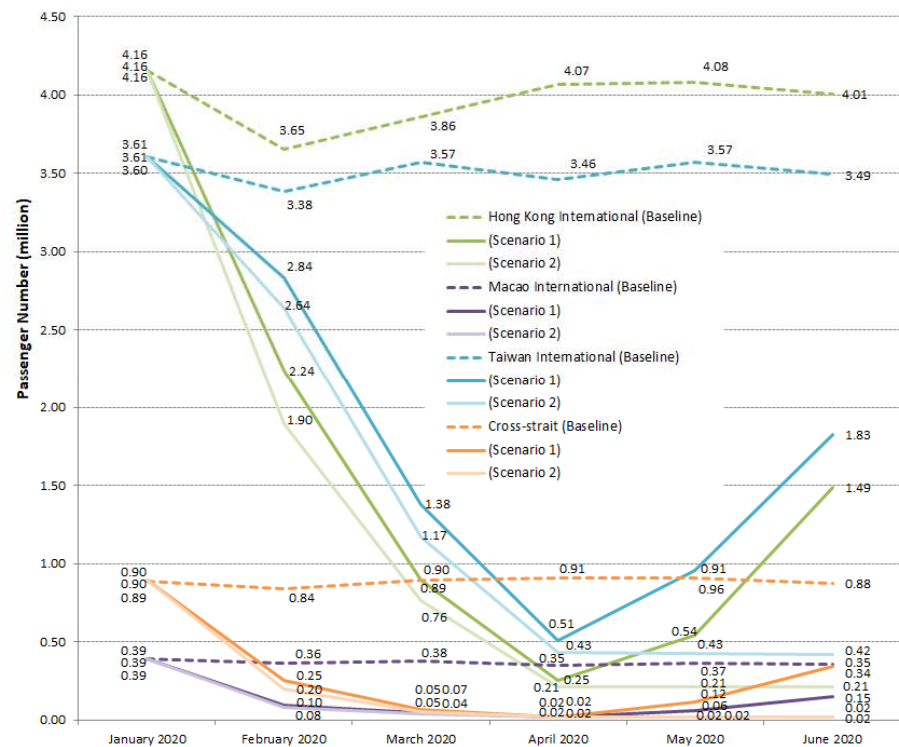

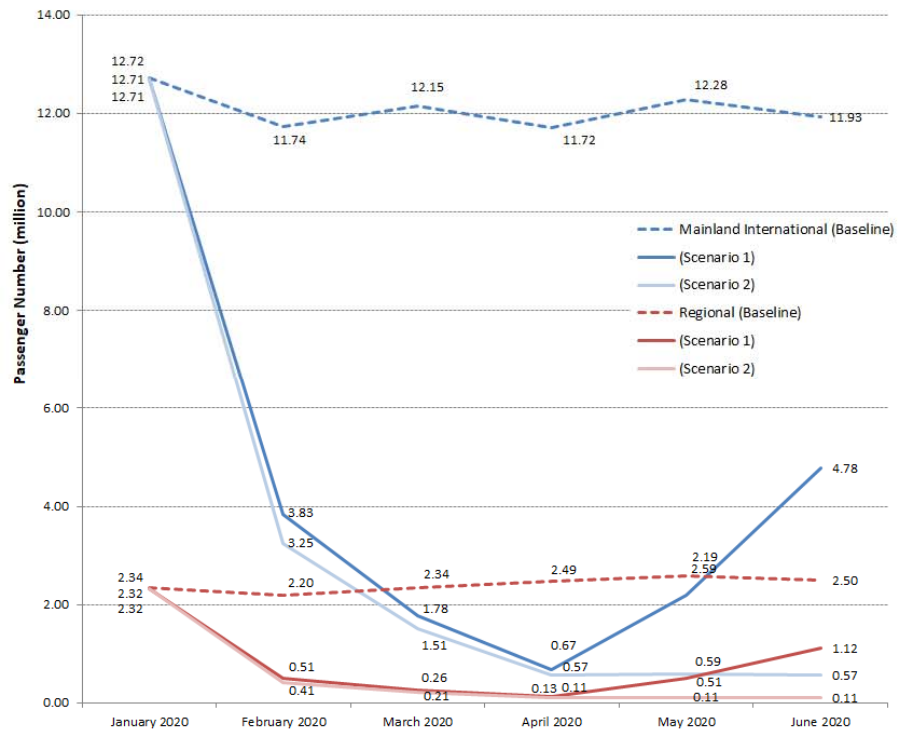

A total of 86 to 99 million passenger reduction in first half 2020 compared to Baseline

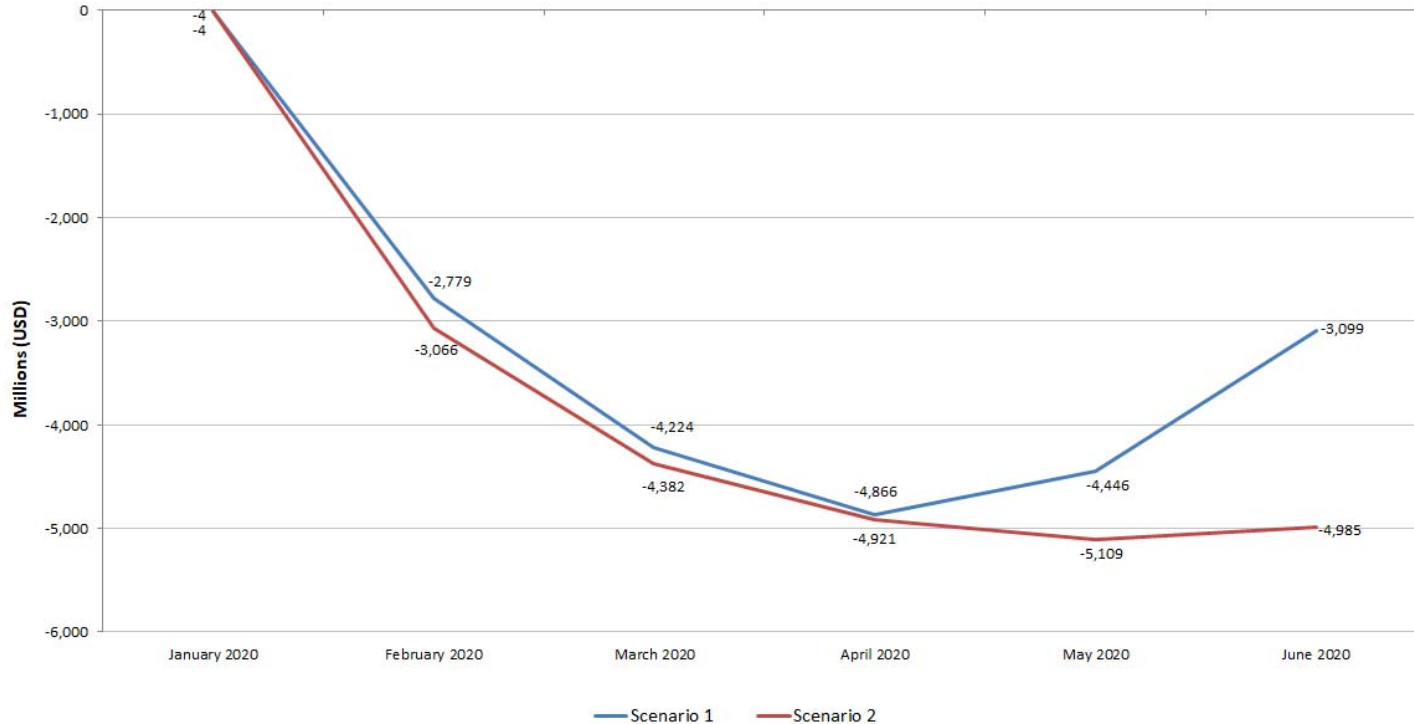

Break-down of passenger number by route

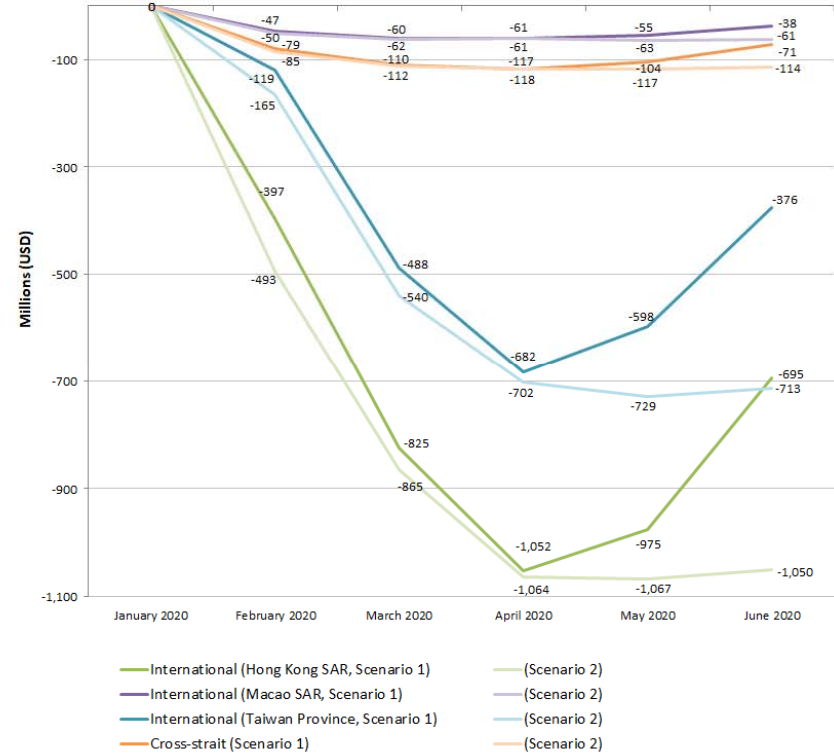

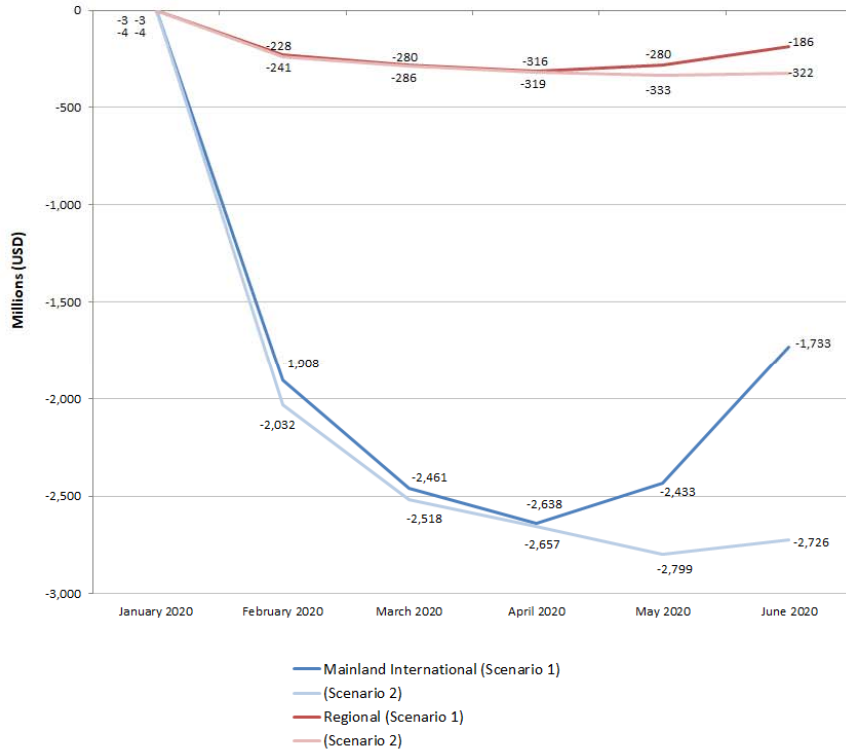

Approx. USD 19.4 to 22.5 billion loss of airline revenues in first half 2020 compared to Baseline

- Mainland international: calculated with an average fare of USD 250 per passenger based on traffic/financial reports of CA, CZ and MU with wide variations by destination (20% lower for LCCs);
- Regional: calculated with an average fare of USD 135 per passenger based on traffic/financial reports of CA, CZ and MU (20% lower for LCCs);
- Hong Kong and Taiwan International: calculated with an average fare of USD 287.6 per passenger with wide variations by destination (20% lower for LCCs);
- Macao International: calculated with an average fare of USD 172 per passenger (ditto);
- Cross-Strait: calculated with an average fare of USD 135 per passenger (ditto)

Break-down of revenue reduction by route

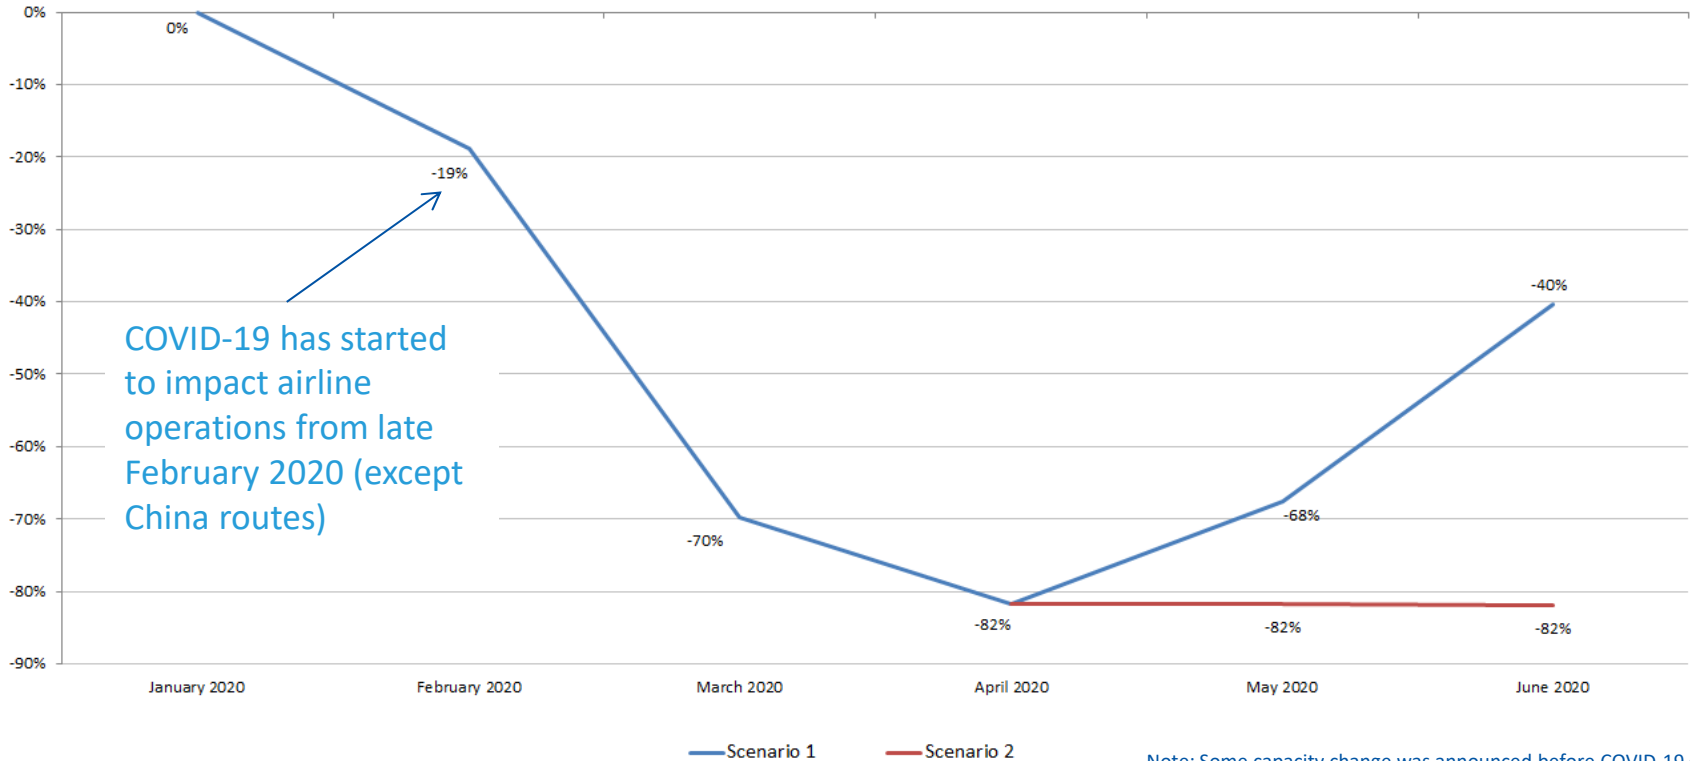

Republic of Korea

The estimates indicate the impact in terms of scheduled international passenger traffic from/to Republic of Korea during first half 2020 compared to originally-planned:

- Overall reduction of **46 to 55% of seats offered by airlines**
- Overall reduction of **23 to 28 million passengers**
- Approx. **USD 4.7 to 5.8 billion potential loss** of gross operating revenues of airlines

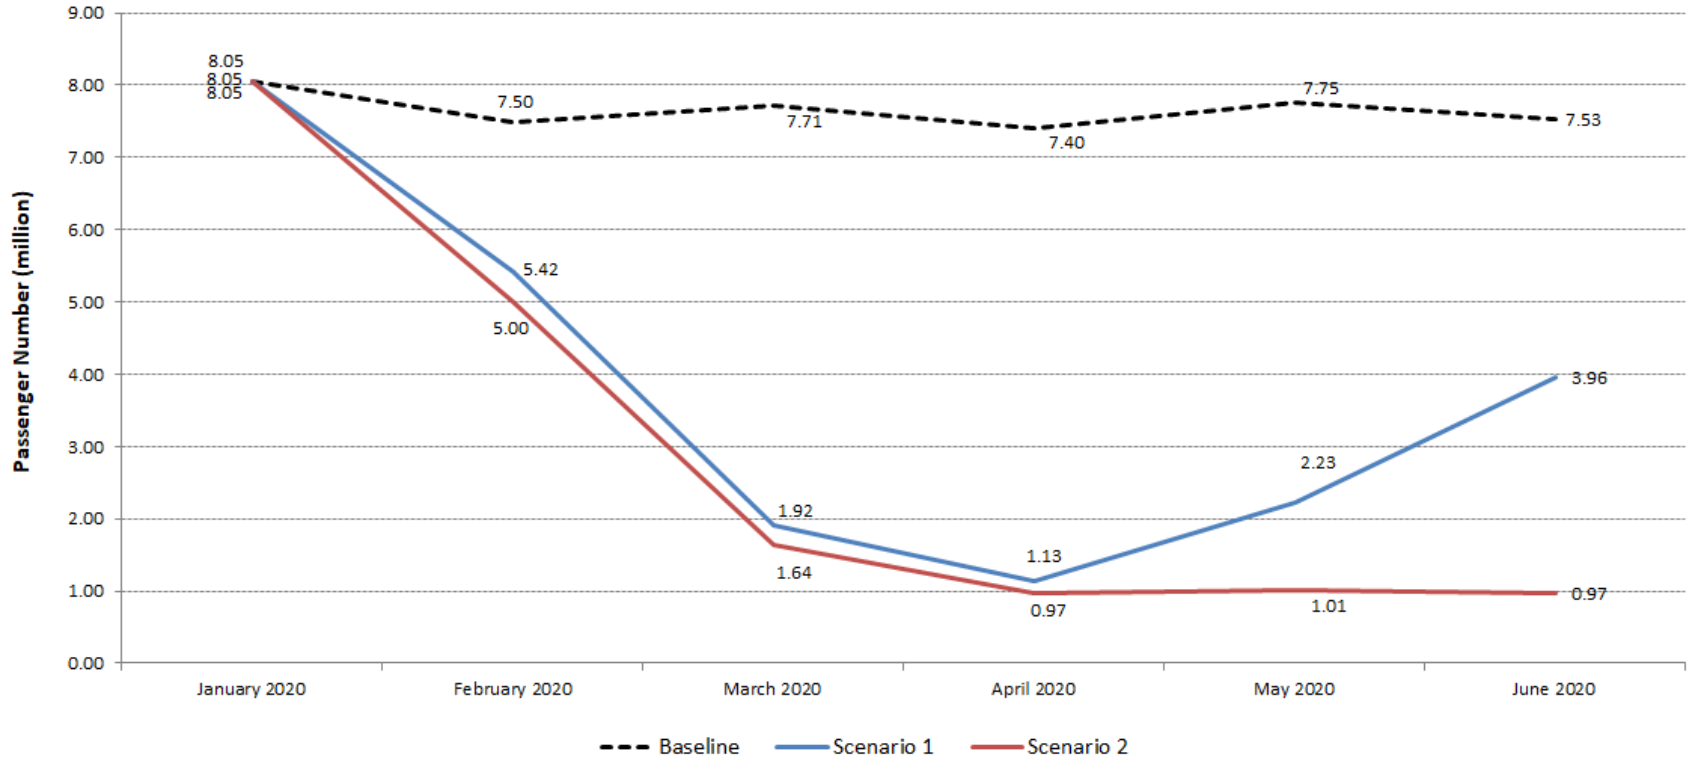

46 to 55% seat capacity reduction in first half 2020 from Baseline

Note: Some capacity change was announced before COVID-19 outbreak

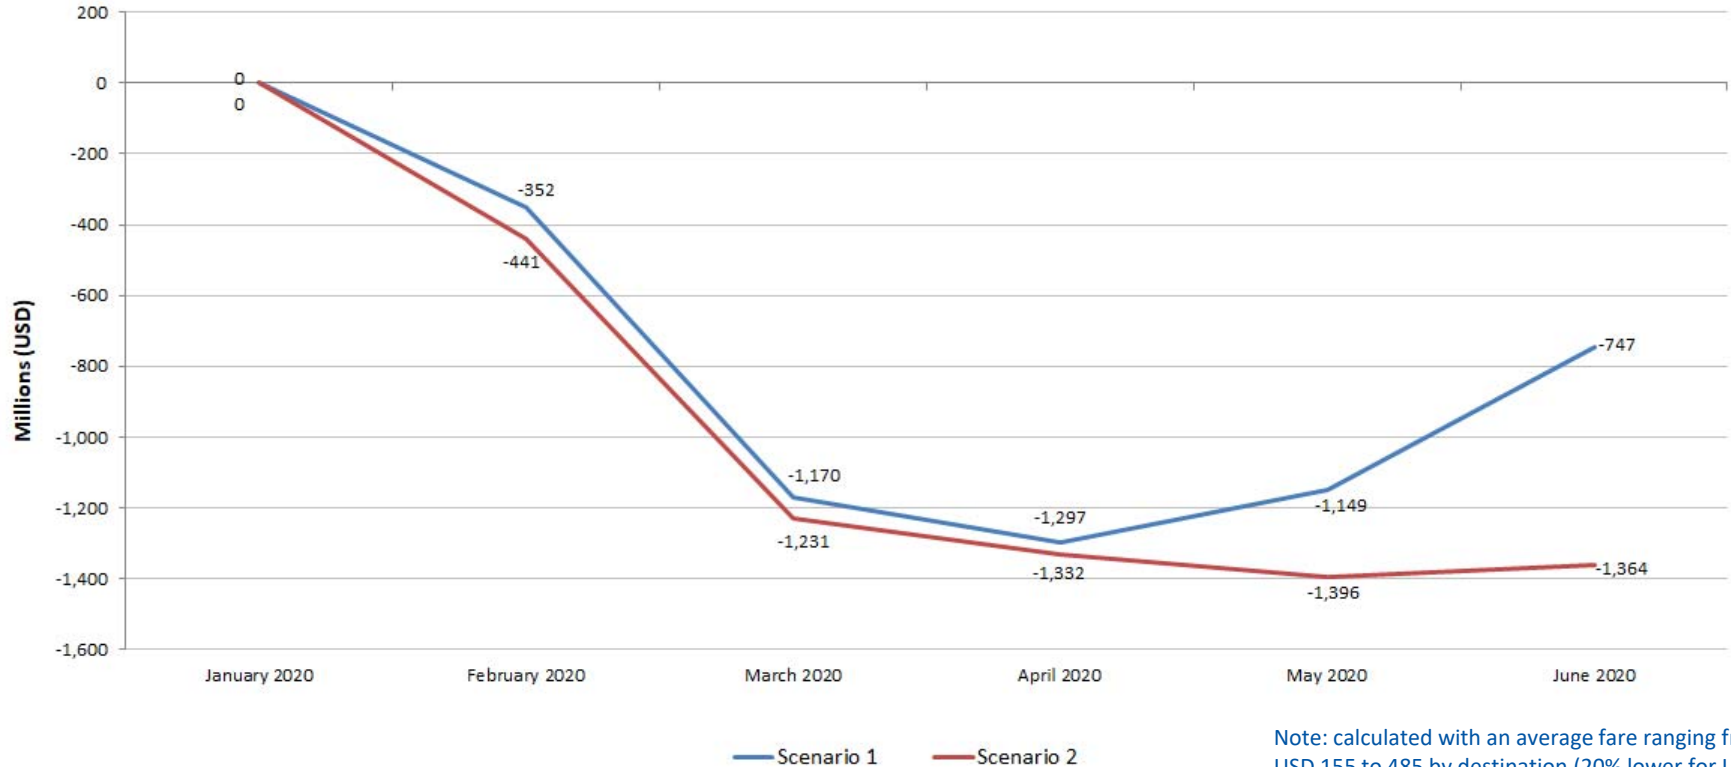

23 to 28 million passenger reduction in first half 2020 compared to Baseline

Approx. USD 4.7 to 5.8 billion loss of airline revenues in first half 2020 compared to Baseline

Note: calculated with an average fare ranging from USD 155 to 485 by destination (20% lower for LCCs)

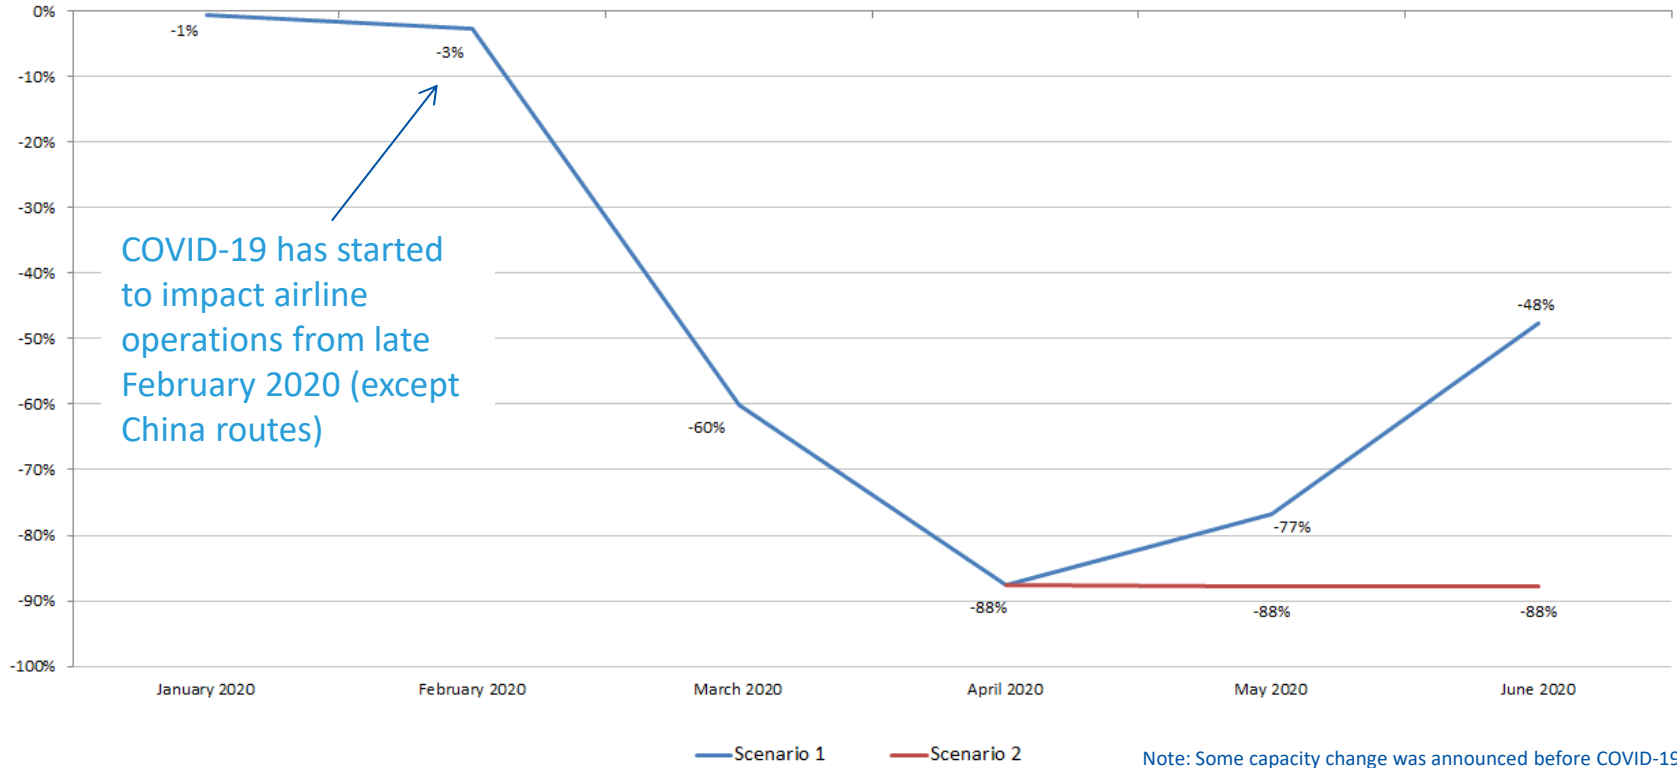

Italy

The estimates indicate the impact in terms of scheduled international passenger traffic from/to Italy during first half 2020 compared to originally-planned:

- Overall reduction of **50 to 60% of seats offered by airlines**
- Overall reduction of **34 to 41 million passengers**
- Approx. **USD 4.0 to 4.9 billion potential loss** of gross operating revenues of airlines

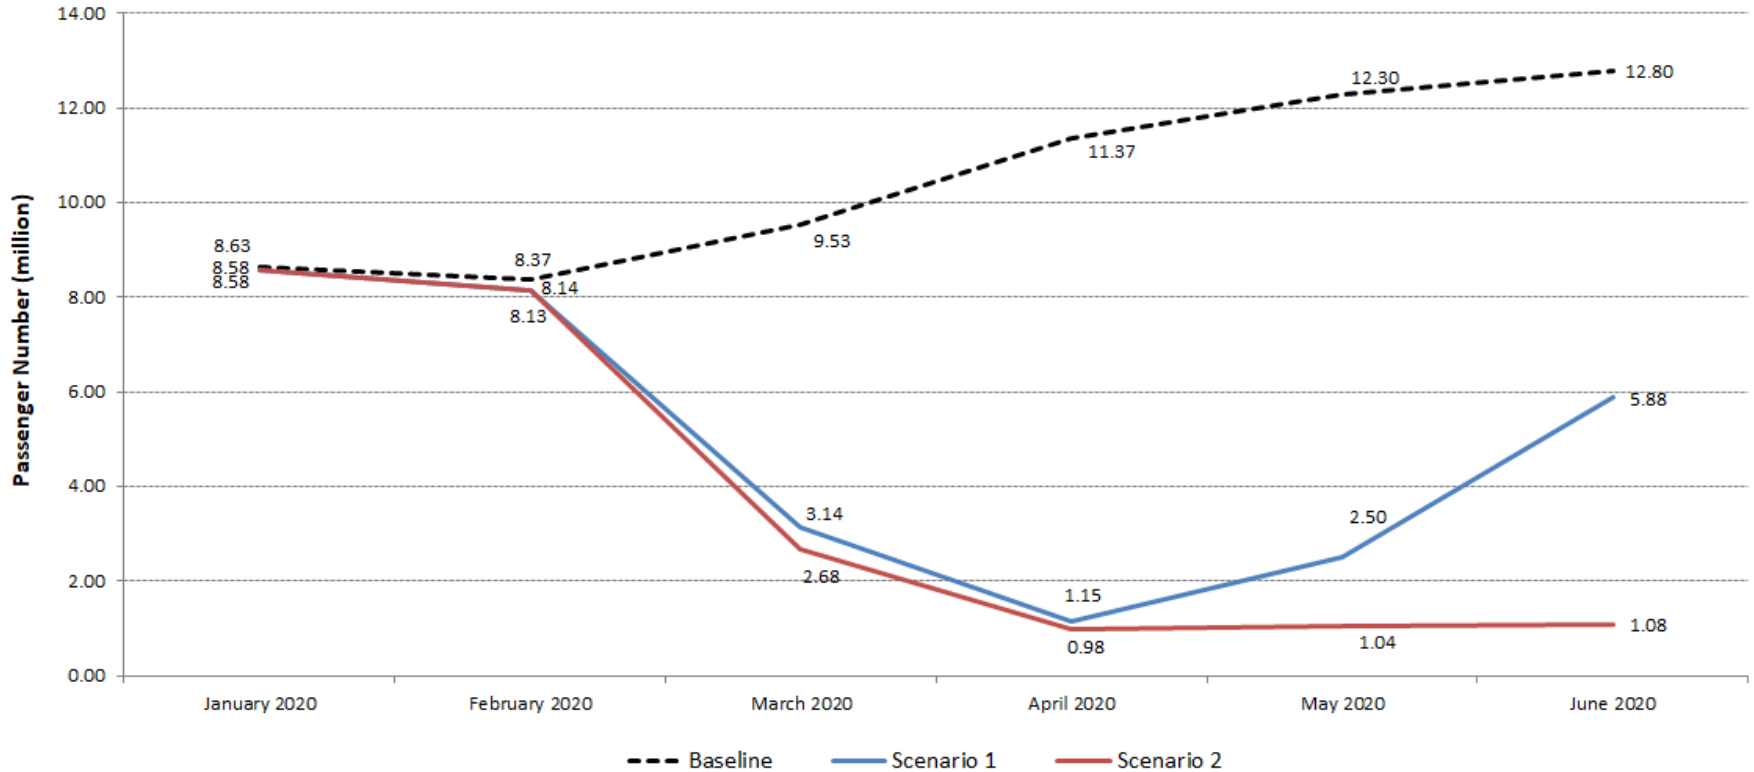

50 to 60% seat capacity reduction in first half 2020 from Baseline

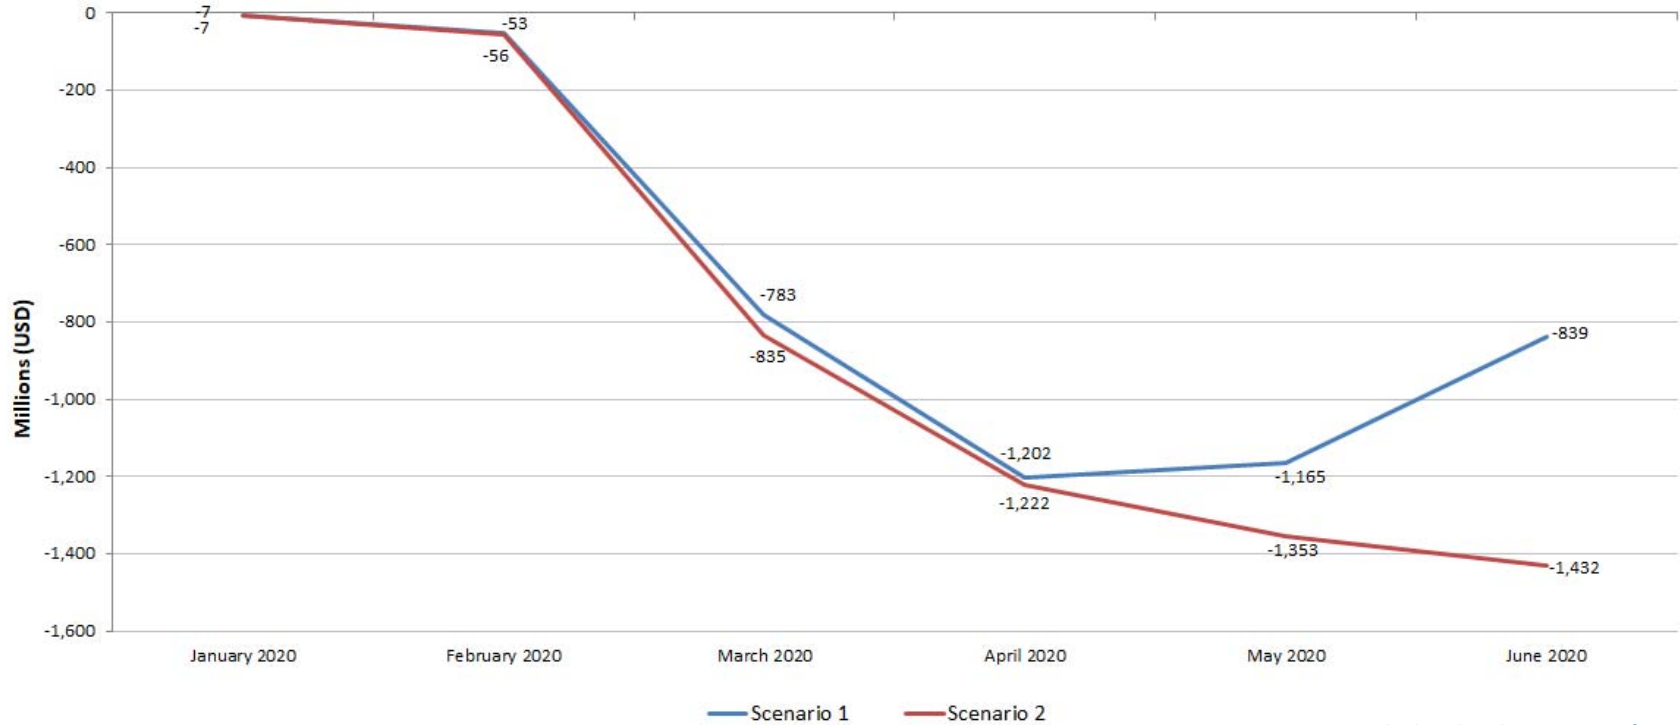

34 to 41 million passenger reduction in first half 2020 compared to Baseline

Approx. USD 4.0 to 4.9 billion loss of airline revenues in first half 2020 compared to Baseline

Note: calculated with an average fare ranging from USD 60 to 485 by destination (20% lower for LCCs)

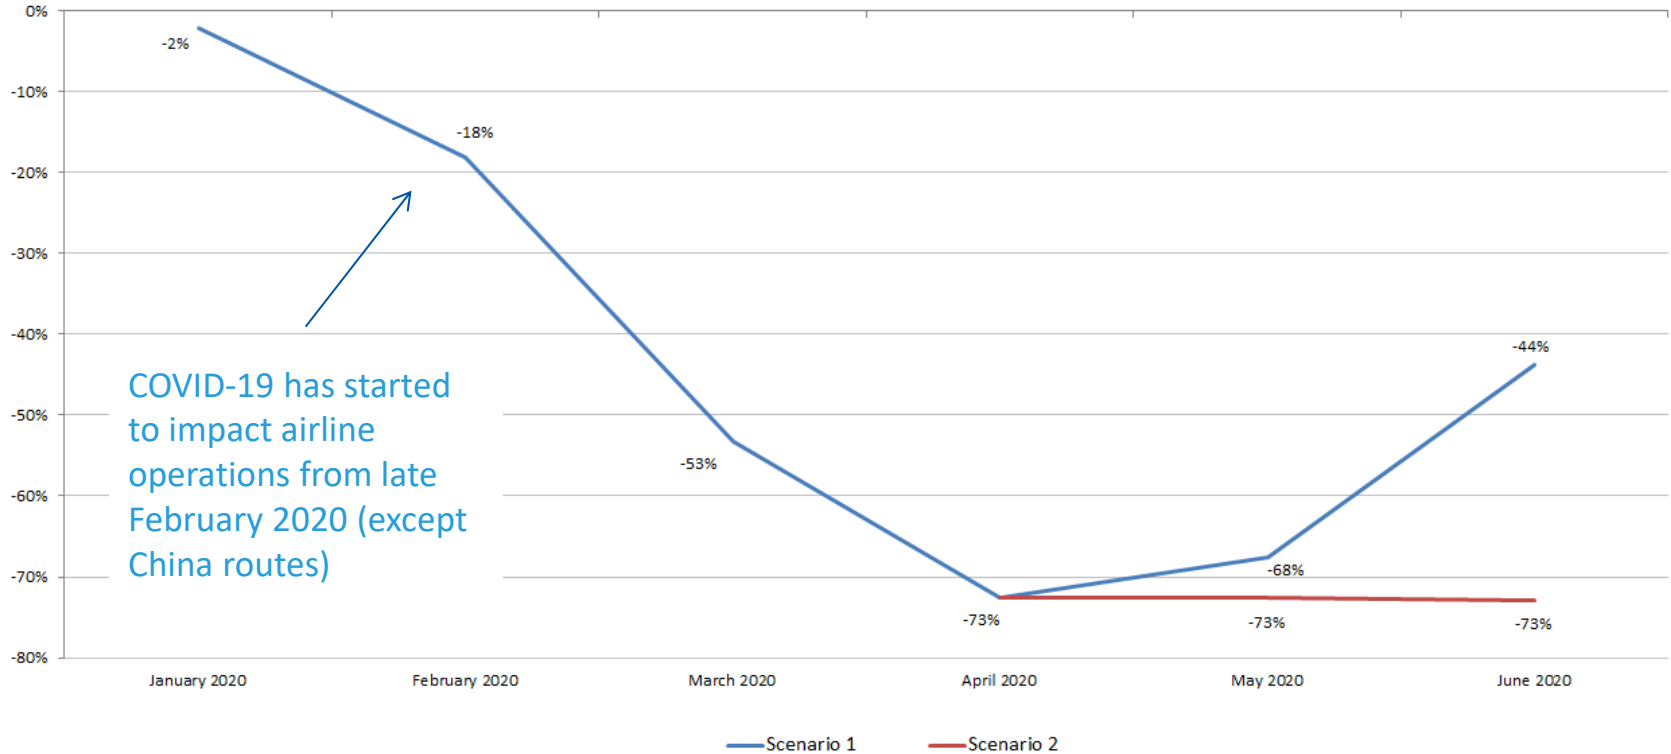

Iran (Islamic Republic of)

The estimates indicate the impact in terms of scheduled international passenger traffic from/to Italy during first half 2020 compared to originally-planned:

- Overall reduction of **43 to 49% of seats offered by airlines**
- Overall reduction of **2.4 to 2.8 million passengers**
- Approx. **USD 370 to 450 million potential loss** of gross operating revenues of airlines

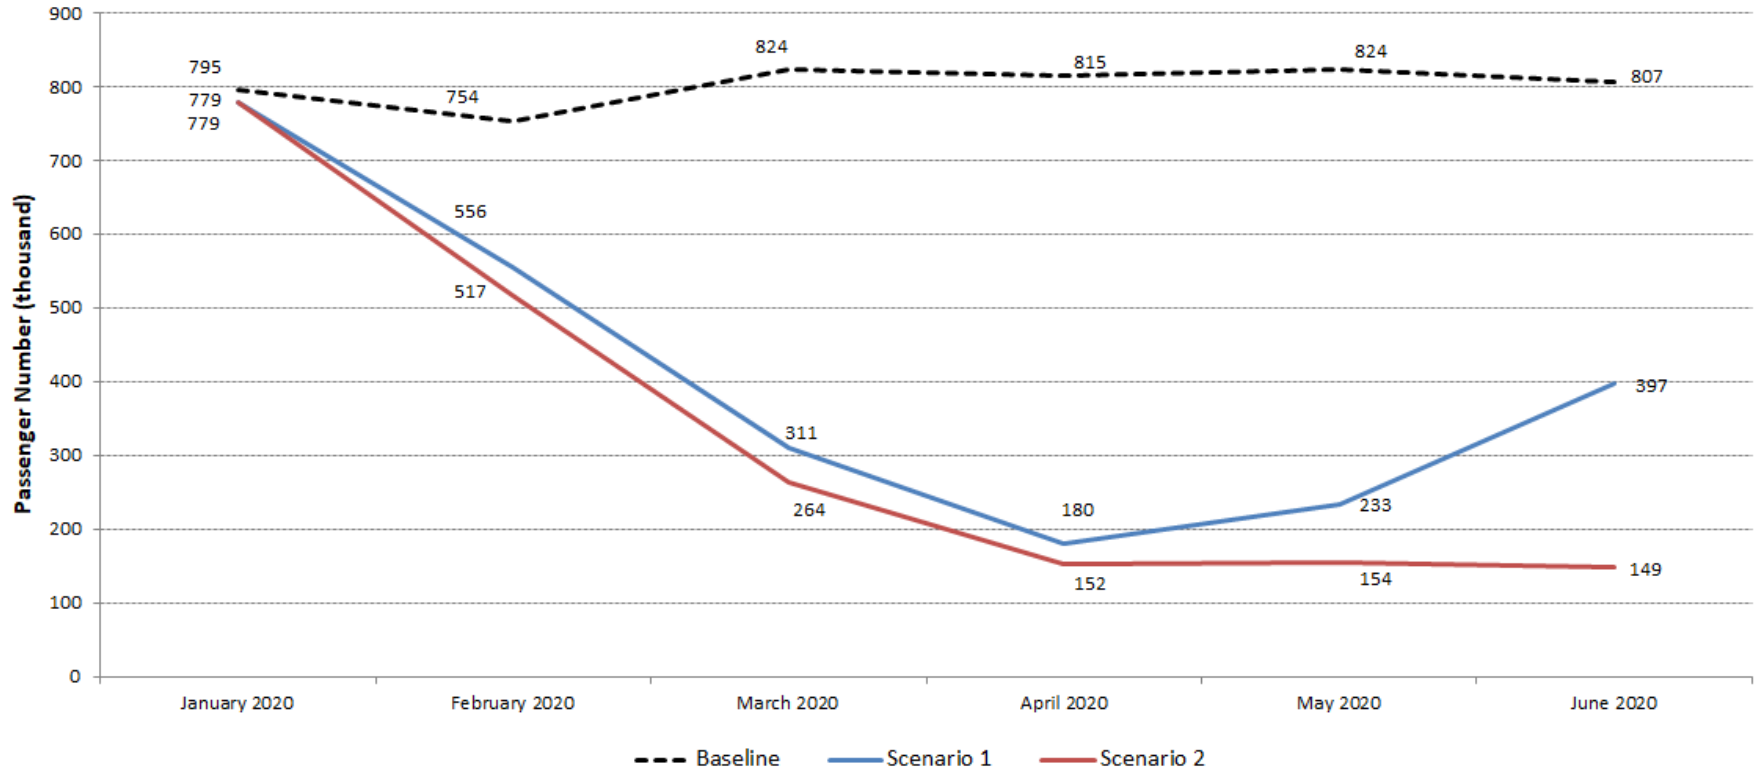

43 to 49 % seat capacity reduction in first half 2020 from Baseline

Note: Some capacity change was announced before COVID-19 outbreak

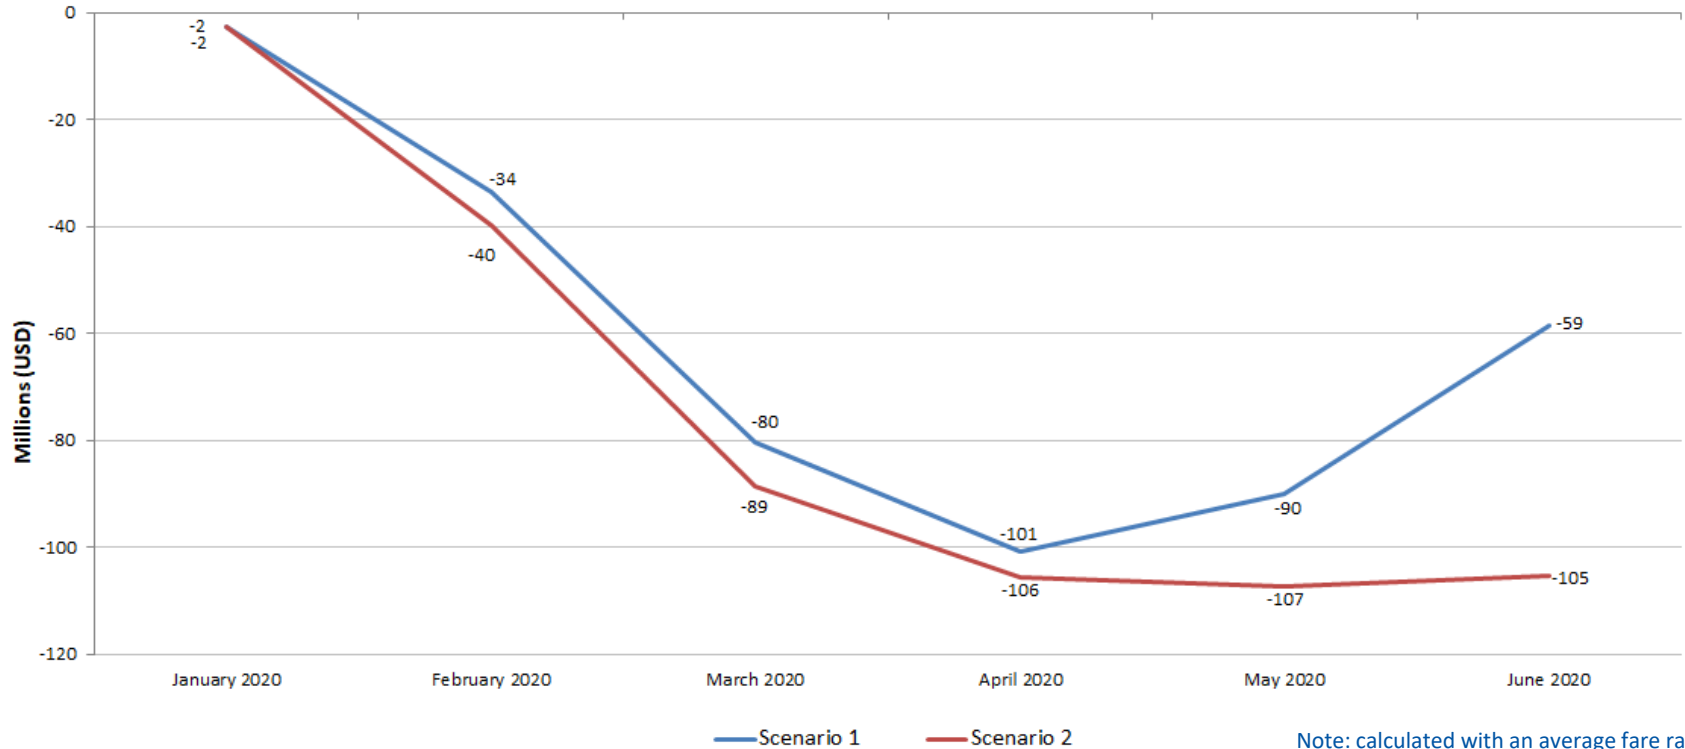

2.4 to 2.8 million passenger reduction in first half 2020 compared to Baseline

Approx. USD 370 to 450 million loss of airline revenues in first half 2020 compared to Baseline

Note: calculated with an average fare ranging from USD 105 to 370 by destination (20% lower for LCCs)

Appendix: Scenario assumptions

Assumptions (Global)	Baseline (Originally-planned)		Scenario 1 (V-shaped)		Scenario 2 (U-shaped)	
	Seat capacity reduction from originally-planned	Passenger load factor	Seat capacity reduction from originally-planned	Passenger load factor	Seat capacity reduction from originally-planned	Passenger load factor
